PERIYAKULAM MASTER PLAN

CHAPTER - I

1.1.0 INTRODUCTION

The towns grow due to the natural growth of the population living within the town and as well as due to the migration of people living in villages around the town. When the town's population increases the needs of the town also gets multiplied. Concentrated efforts to assess the changing requirement of the town and as well as formulation and implementation of schemes to meet this requirement is essential to provide health and livable environment for the citizens of this town.

The preparation of Master Plan for urban areas aims at guiding the development to take place the orderly manner with the principal objective of offering comfort and convenience to the various activities of life and also focusses attention on the growing needs of the town and attempts to find solution to these problems. It is a comprehensive study, covering the socio economic and physical efforts of the town.

The Master Plan forms the basic document for development of the town. It reflects the people's desires and wants and suggests constructive measures for better and conducive living.

The Government of Tamil Nadu has enacted the Town and Country Planning Act 1971 which provides for constituting Local Planning Authority for the urban centres in Tamil Nadu. The Local Planning Authority under this Act has been constituted for Periyakulam Town by the orders of the Government in G.O.No. ⁸⁵⁰ 1138, RD&LA. Department, dated 7.6.1967. Under Section 17 of the above said Act, the 8.4.1975.

Local Planning Authority is charged with the responsibility to prepare the Master Plan and submit to the Government for the area notified as Local Planning Area by the Government. The scope and contents of the Master Plan are explained in sub-sections 1&2(a) to 2(n) of Section 17 of the Town and Country Planning Act 1971.

This report aims at projecting the existing problems of the Periyakulam Town and study the potentials of development and suggest remedial measures for solving the problems and also indicate the Planning Development Policy for the future.

LOCATION OF TOWN:

1.1.01. Periyakulam Town is located to the West of Madurai City, in the District of Madurai and in the Northern end of the Periyakulam Taluk. It is at the foot hills of famous summer resort viz. Kodaikanal Hills and is surrounded by fertile agricultural land and groves.

HISTORY OF THE TOWN

1.1.02. Periyakulam town is the head-quarters of the Periyakulam taluk. It is picturesquely situated on the Palm-fringed banks of Varahanadi with the great wall of Palani immediately North of it. It consists of three parts, the Thenkarai, Vadakarai, Kaikalankulam. The first of these lies on the Southern bank of the river and the other two lie on the Northern Bank. The town is surrounded by pleasant Periyakulam valley which correspond with those of the beautiful Kambum and Varashanad valleys. A long narrow strip of country is shut completely in by Palani and the Travancore hills on the North and West and by the Varashanad and Andipatti Range on the East. Down the centre of the valley run the Suruli and Vaigai rivers.

1.1.03 The town is situated at 10°07' North Latitude and 77°32' East latitude and 86 kilometres West of Madurai and 75 Kilometres South West of Dindigul Town. It is 12 kilometres away from Vaigai Dam, which is one of the principal sources of irrigation, for Madurai District.

CLIMATE:

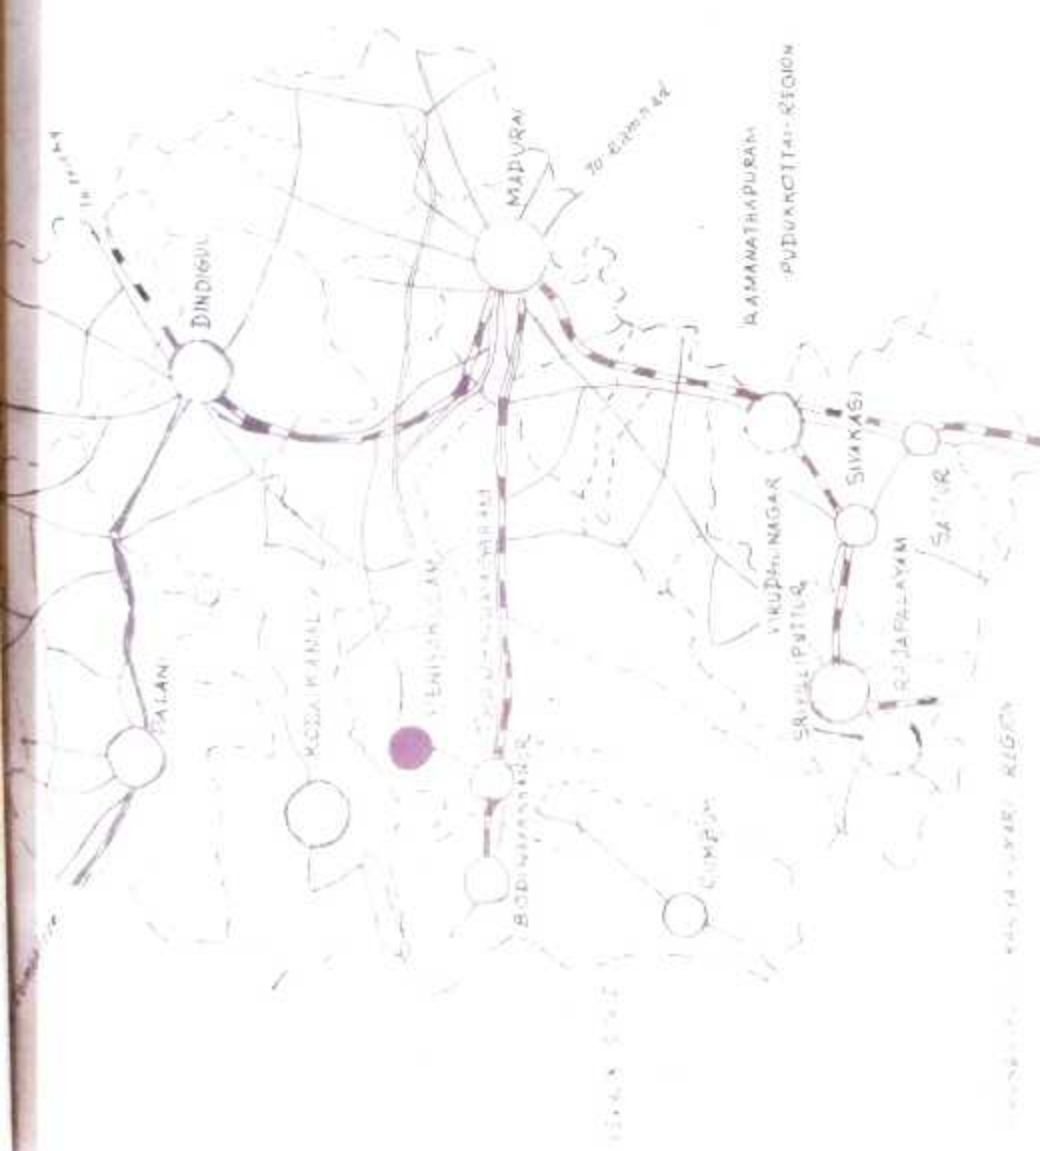

1.1.04 There is no observation centre at Periyakulam town for recording the rainfall, wind-velocity and direction of wind, etc., the particulars relating to Madurai city are taken as applicable to this town. Accordingly four distinct seasons could be noticed in the Region.

- (d) North-East Monsoon season (October - November)

EARLY HISTORY

1.1.05 Periyakulam Taluk was once called Thenkerai Taluk and it is the biggest in Madurai District but much of it consisted of hills and forests. There is an ancient Siva Temple in Periyakulam Town containing inscription of "Pandava Kings" who ruled between 1216 and 1308. The temple is described in one of the inscription as the "Rajendra Cholismaramudaiva Nayanar". Another temple at Periyakulam is "Nedungula-nadu" on a hill near the village is dedicated to "Kailasanatha Swamy". This also contains an inscription of the Pandava King "Maravarma" - alias "Tribhuvanchakrevarthi Samudra Pandava Devar" (1216 to 1235) who took over the Chola country and was asked to perform the appointment of heroes at "Mudigonda Cholapuram" granting lands to the "temple of Tirumalai Nayanar" at Veikularamanallur in Menodungalamodu".

The name of the town, it is believed might have been after the big tank which was located in old village (even now available) which was called as Periyakulam in Tamil.

1.1.06 Periyakulam Municipality was constituted in the year 1886 with the Members appointed by the Government and charged to look after the welfare of the people. Only in 1899 an elected Council was formed with Members of the Council. The civic body which was constituted with 4 Members has enlarged to accommodated 28 Members now to represent the growing population which has reached 44310 in 1981.

RAINFALL

1.1.07 Based on the rainfall data the Madurai District could be divided into three regions namely, the hilly region, the eastern region and the Cumbum region. The Cumbum region comprises of Palani Taluk, Western part of Dindigul and Periyakulam Taluk. The most conspicuous feature of Palani Kambum region is the low amount of rainfall during the South-West monsoon and considerable downpour during the retreating monsoon 190 mm. is the maximum rainfall and usually it occurs in the month of October.

The average annual rainfall is about 879.9 mm and the total number of rainy days is only 55.

TEMPERATURE

1.1.08 The maximum temperature during summer is 98.8°F. and that during winter is 84.7°F. The corresponding average minimum temperature is 78.0°F. and 80.2°F. The relative humidity in summer ranges from 66% and 42% and in winter from 90% to 59%. Hot weather lasts from March to June.

WIND DIRECTION

1.1.09 The wind velocity is 6.2 km/hour and it is predominant towards North-West and North-East.

SOIL

1.1.10. The major groups of soils that are found in the Periyakulam are (1) Black and (2) Red variety. The red soil constitute 91% white black soil is only 9%. Paddy coconut plantation and crops are predominant cultivation in this Region.

EXISTING POPULATION STRUCTURE

1.2.01. The Local Planning Area which covers the Periyakulam town extends over an area of 2.10 square kilometres. The total population of the Planning Area

(Periyakulam Town) coming to 44,310 as per the 1981 Census. Local Planning Area has been constituted for Periyakulam in G.O.Ms.No.2063, R.D.&L.A., Department, dated 20.9.1973, The same has been confirmed under section 10(4) of the Town and Country Planning Act 1971 in Gazette as per G.O.Ms.No. 681 R.D.&L.A.Department, dated 16.3.'74 and under section 11(1) or 11(3)(7) in G.O.Ms.No. 650, R.D.& L.A. Department, dated 8.4.1975.

STUDY OF THE GROWTH OF POPULATION

1.2.02 The decadalwise population growth of Periyakulam town is given in the Table No. (1).

The growth of population of the town for the past few decades, was as follows:

Table (1)

Decennial Population and Variation of Population

Year	Population	Variation	Percentage of variation
1901	17,960	-	-
1911	18,715	755	04.20
1921	16,478	(-) 2,237	(-) 11.96
1931	23,004	6,526	39.60
1941	25,882	2,878	12.51
1951	31,000	5,118	19.77
1961	38,335	5,335	17.21
1971	41,565	5,226	14.38
1981	44,310	2,749	06.61

SOURCE: Census of India 1971 - General Population Tables.

Note: Net variation over eight decades in 26,350 persons 146.72%.

TREND OF POPULATION GROWTH

REGISTRAR OF TOWN & COUNTRY PLANNING

Table (2)

Growth rate compared with District and State figures

Decade	Percentage variation of the population		
	Periyakulam Town.	Madurai District Urban.	Tamil Nadu State Urban.
1901 - 1911	04.20	(-) 24.40	03.80
1911 - 1921	(-) 11.95	16.45	44.00
1921 - 1931	36.90	44.85	34.80
1931 - 1941	12.51	30.15	17.00
1941 - 1951	19.77	39.87	28.20
1951 - 1961	17.21	26.13	25.80
1961 - 1971	14.38	30.36	38.70
1971 - 1981	06.61	19.43	-

SOURCE: Census of India 1971 "General Population Table".

The Growth rate is very low in all decades since 1901 as compared to that of Madurai District Urban population and of State. Urban Population.

1.40 Sex Ratio

Table (3)

1.2.06 The Sex ratio in Periyakulam town for the past few decades was as follows:

Year	Males	Females	Number of Females/1000 Males.
1901	8,502	9,458	1,113
1911	8,817	9,898	1,123
1921	7,844	8,634	1,105
1931	11,109	11,895	1,071
1941	12,534	13,348	1,065
1951	15,444	15,556	1,007
1961	18,148	18,188	1,001
1971	20,844	20,717	994
1981	22,492	21,818	970

1.2.07. The sex ratio of females per 1,000 males in the past decades, since 1901 show the decreasing trend. A scrutiny of the particulars published in 1981 Census reports are listed below.

Table (4): Decreasing trend in male population

State/ District/ Taluk	URBAN			Proportion of females per 1,000 males.
	Total	Male	Female	
TAMIL NADU	48,408,007	24,487,624	23,920,453	977
MADURAI DISTRICT	4,535,897	2,296,614	2,230,283	971
PERIYAKULAM TALUK	112,724	57,375	55,351	965

SOURCE: 1981 Census.

This decrease in male population may perhaps be due to male migration to the other industrially developed areas to seek employment.

Total	43,553	100.00	22,039	50.61	21,514	49.39

ECONOMIC BASE1.3.01. INDUSTRIAL, COMMERCIAL ETC:

The primary source of economy of Periyakulam town is agricultural based since it is surrounded by fertile agricultural lands. The industrial activities are significantly absent and very few service industries like automobile workshops are located in the town. The study of the occupational pattern reveals that 47 percent of workers are employed in Primary sector and nearly 10 percent in Secondary Sectors and nearly 43 percent in Tertiary Sector. In primary sector the agricultural labourers constitute 34.08 percent and in Secondary sector the workers engaged in other than household industries is conspicuous. The Trade and Commerce is the next important economic activity when compared to agricultural activity which constitutes 43.44 percent of total workers.

UNIVERSITY OF CALicut STUDIES

PIE CHART SHOWING

THE OCCUPATIONAL STRUCTURE

UNIVERSITY OF CALICUT, KERALA

DIRECTORATE OF DISTANCE EDUCATION, KERALA

UNIVERSITY OF CALICUT, KERALA

1.3.02. The agricultural activity centres upon growing the paddy and cash crops like Coconut, Mango and vegetables. The cash crops are exported to other parts of the District. The commercial activity includes the whole-sale and retail trade, the whole-sale being on the export of agricultural produce and the retail on the distribution of mainly domestic goods. The trading units are spread along main transport routes of the town. There is no organised industrial or commercial activity which would support the economy of the town.

1.3.03 The dependency of the workers on various occupations are depicted in the following table.

S.No.	category of workers	Persons	Percentage to the total workers
I. PRIMARY SECTOR:			
1)	Cultivators	1,405	11.72
2)	Agricultural labourers	4,086	34.08
3)	Livestock, Forestry Fishing	72	00.60
4)	Mining and Quarrying	2	00.01
		5,565	46.41
II. SECONDARY SECTOR:			
5a)	Household industry	86	00.72
5b)	Other than household Industry	1,024	08.54
6)	Construction	107	00.89
		1,217	10.15
III. TERTIARY SECTOR:			
7)	Trade and Commerce	1,768	14.74
8)	Transport storage and communication	1,302	10.86
9)	Other services	2,139	17.84
		5,209	43.44
	Total workers	11,991	100.00
	Non workers	29,570	-

LEVEL OF URBANISATION:

1.4.01. The mapping of the existing land use is very much essential to assess the present and future potential for development and also to meet the legal requirement of Town and Country Planning Act of 1971 for clearance of Planning permission. The critical study of the distribution and character of the use for which the land has been put in forms a valuable document in formulation of Master plan.

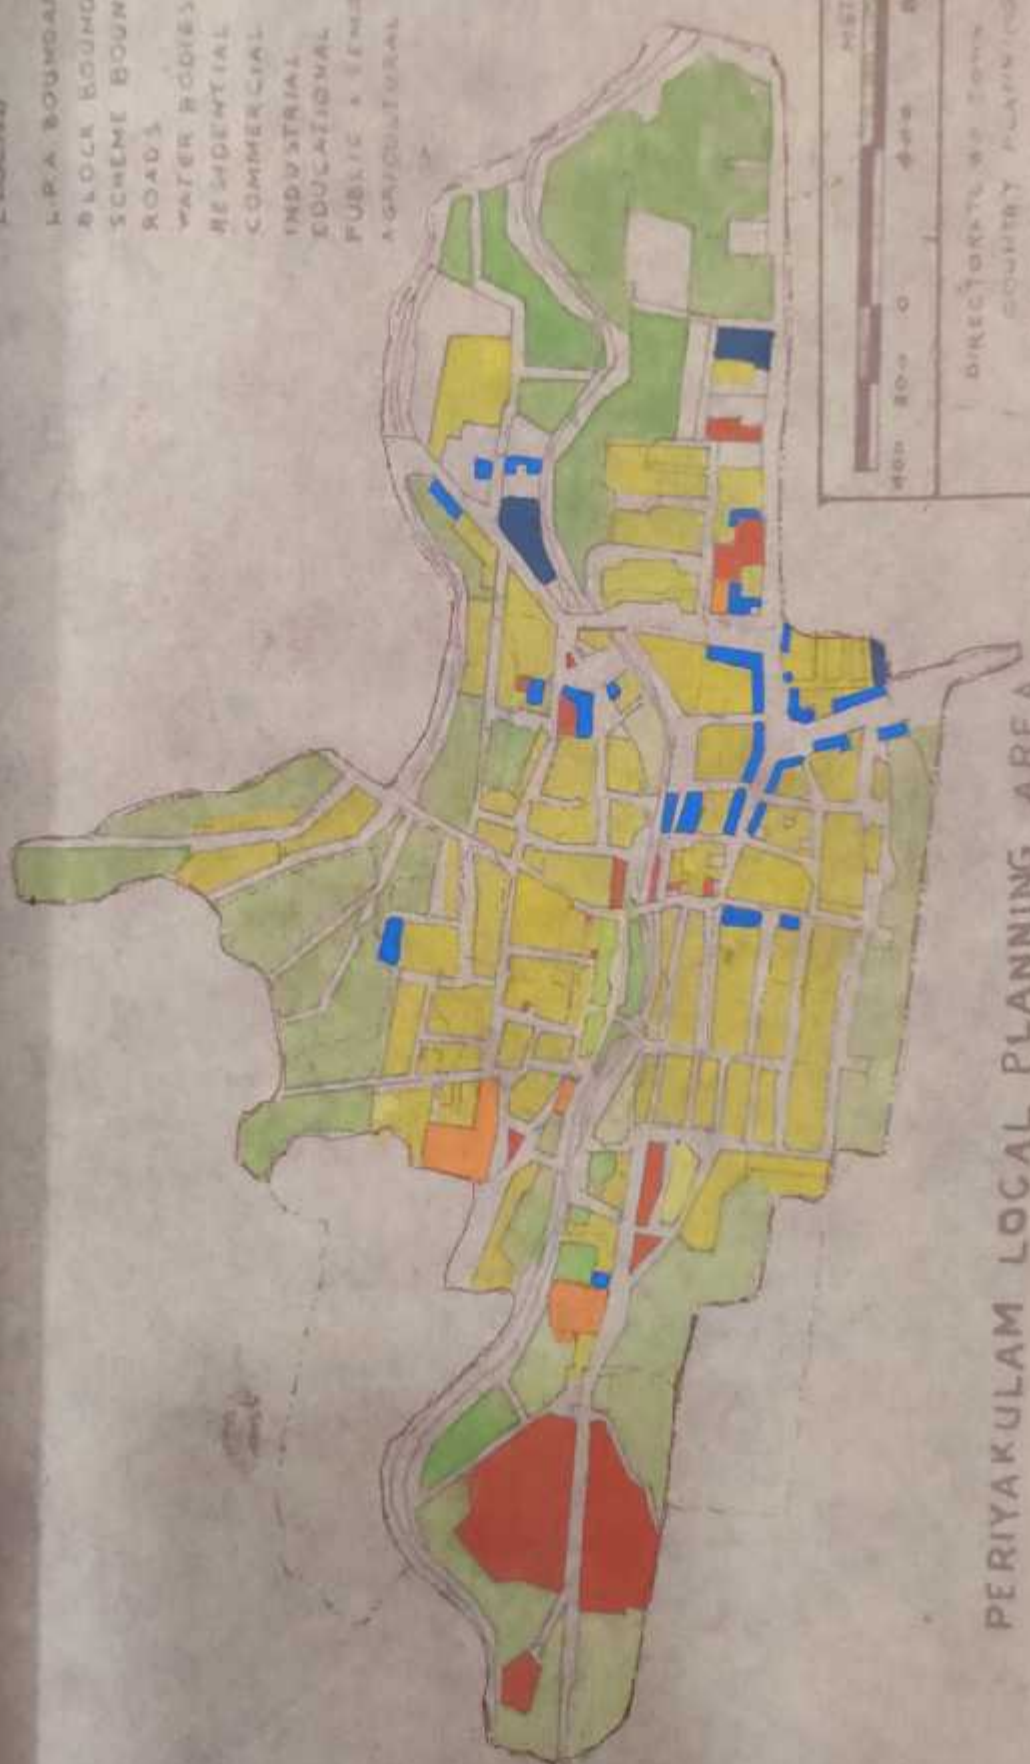

1.4.02. The existing land use pattern of Periyekulam Town is as indicated in the general land use map. The Varsa river bisects the town into two halves. The northern part is being called in local name as Vadakarai and the part on the south is called as Thenkarai. The Vadakarai is mainly a residential pocket with very few shops and the main Bus stand of this town is located in this area. The Thenkarai houses both Government and Private offices, Taluk Court, many schools main shopping area and market of the town. These two distinct parts of the town are interconnected by a bridge and a foot bridge. The banks of the river are pre-dominantly developed with coconut grows.

The land use pattern of the town is tabulated below.

The agricultural use constituted 43.18% to the total extent of town and the developed area of the town occupies 56.82% to the total extent of town of total area covered by the town. Among the developed area, residential use occupies highest percentage which is followed by the "Transport and Communication use".

1.4.05. INSTITUTIONS:Educational and Cultural Activities:

With the advent of Government free scheme for education and the town has registered a high rise in school going population during the recent years. The enrolled pupil strength of all the Educational Institutions in Periyakulam town is 12,088. The total area occupied by all those institution is about 10.15 acres and the total built up area is about 02.43 acres. The open spaces including play fields attached to the Institutions total to 07.59 acres.

The analysis regarding school strength, site area, built up area and play ground are given below:
Table (9) Educational particulars:

S.No.	Classification	No.	Strength	Site area (Ac.)	Built up area (in Sq. ft.)	Play ground (ft.)

PERU, YAKULA LOCAL PLANNING AREA

1.4.06. PRIMARY EDUCATION:

There are 9 Elementary Schools in the town with a strength of 2,035. The total play area of all the Elementary school is about 05.05 hectares.

There are 18 Higher Elementary Schools in the town with a strength of 9,578 pupils. It has got play ground facilities.

1.4.07. SECONDARY EDUCATION:

There are 2 high schools in the town with a strength of 1,566 of which one is for boys and the other girls. Schools are maintained by the Government. The total area occupied by the schools is about 04.70 acres including about 00.85 acre of play area.

There is one Arts College situated in Southern site of the town. One glaring deficit is that the educational institutions are not endowed with open space and play ground which would be very detrimental to the health of the students.

1.4.08. RECREATION FACILITIES:

Recreational facilities in the town are tabulated as given below.

Table (10)

Sl no.	Name of use	no.	Site area	Built up area	Extent
1.	Library	3	0.02330	0.0702	-
2.	Cinema theatre	3	3.28680	0.23758	-
3.	Parks	3	0.19100	-	-
4.	Clubs	3	-	-	0.25688
5.	Play-ground	-	-	-	0.05678

1.4.09. RELIGIOUS INSTITUTIONS:

Religious Institutions occupy significance in the life of the Community. There is one important temple in the town called "BALA SUBRAMANIASWAMY" temple situated on the western side of the town near the Municipal boundary.

Equal importance is given for construction of Churches and Mosques for the benefit of the people. The town is very compact and occupied by people of different Religions.

Table (11) Religious Institutions in the Town.

Sl no.	Name of the Institution	Number	Site Area	Built up area
1.	Temple	59	5.12316	1.21574
2.	Mosques	6	0.14202	0.06688
3.	Churches	6	0.26318	0.08440

1.4.10 MEDICAL INSTITUTIONS:

The Government Prince of Wales Hospital, Periyakulam serve the public by providing modern medical facilities. Besides this, there are Municipal and Private Dispensaries, Maternity and Child Welfare Centres. The Municipal Siddha Dispensary is availed by large number of people, for treatment with integrated medicine and the total number of patients treated were 49,515 during the year 1981-82.

The following Table shows the number of health institutions in the town.

Table (12) Medical facilities:

Sl no.	Classification	No.	Ownership	No. of bed strength	In-pati-ents rate	Out-pati-ents rate

1.4.11. LITERARY:Literary in Town:

The distribution of Literates of the town was as follows:

Table (13)

Year	Total Literate	Female Literate	Percentage to the total literate	Male literates	Percentage to the total literate.	Percentage of literate to the total population.
1951	6,944	..	29.30	..	70.70	22.30
1961	17,980	6,440	35.71	11,540	14.29	49.60
1971	25,523	8,827	39.19	13,696	60.81	61.41
1981	23,328	11,676	41.22	16,652	58.78	63.93

Source: Census of India 1971 & 1981

Out of the total Literates males constitute 60.81% while females constitutes 39.19% (in the year 1971) The percentage of Literature to the total population works out as 61.41%. The role played by the Roman Catholic Mission and the Central Schemes might have contributed to the increase in literacy from 49.60% to 61.41% during last decade.

SUMMARY:

1. The periyakulam town is located at the front hills of Kodaikanal hills and has got an advantageous location being close to the Recreational centres like kodaikanal summer resort, Vaigai Dam park and kumbakarai falls. It is situated at a fairly level land at the banks of Varaha nadhi and in the midst of which agricultural fields.
2. It got the status of Municipal town, nearly a century ago and is a Taluk Head-quarters and many Government and Engineering Departments have their offices in this town.

3. On the town is divided by a natural element viz., the river which also acts as a barrier for free flow of men and vehicles. Being old town, the old residential pockets present a bad look and many buildings require complete renovation and renewal.
4. The town is bisected by major roads leading to neighbouring towns like Theni, Andipatti and Batlagundu.
5. The Agriculture is the predominant economic activity. The commercial activity centres on the whole-sale trade of the agricultural produces. The coconut and plantations crops are chief among the goods traded.
6. The community facilities offered and by the civic authorities are too meagre. The recreational aspect is a totally neglected area. Regarding the services like water supply and drainage, the town is yet to be covered under underground drainage scheme. The educational facilities need further strengthening by the provision of play grounds.
7. The river is considered to be an useful physical component in the town is providing facilities for maintaining favourable water table and as well as lung space for a town. The river in this town is thoroughly misused.
8. A striking feature of the town is that it does not have land for expansion. The undeveloped land in and around the town is occupied by agricultural use where coconut is the chief cash crop is given. The only alternative is to extend the town area to include certain

neighbouring villages where dry belt is available.

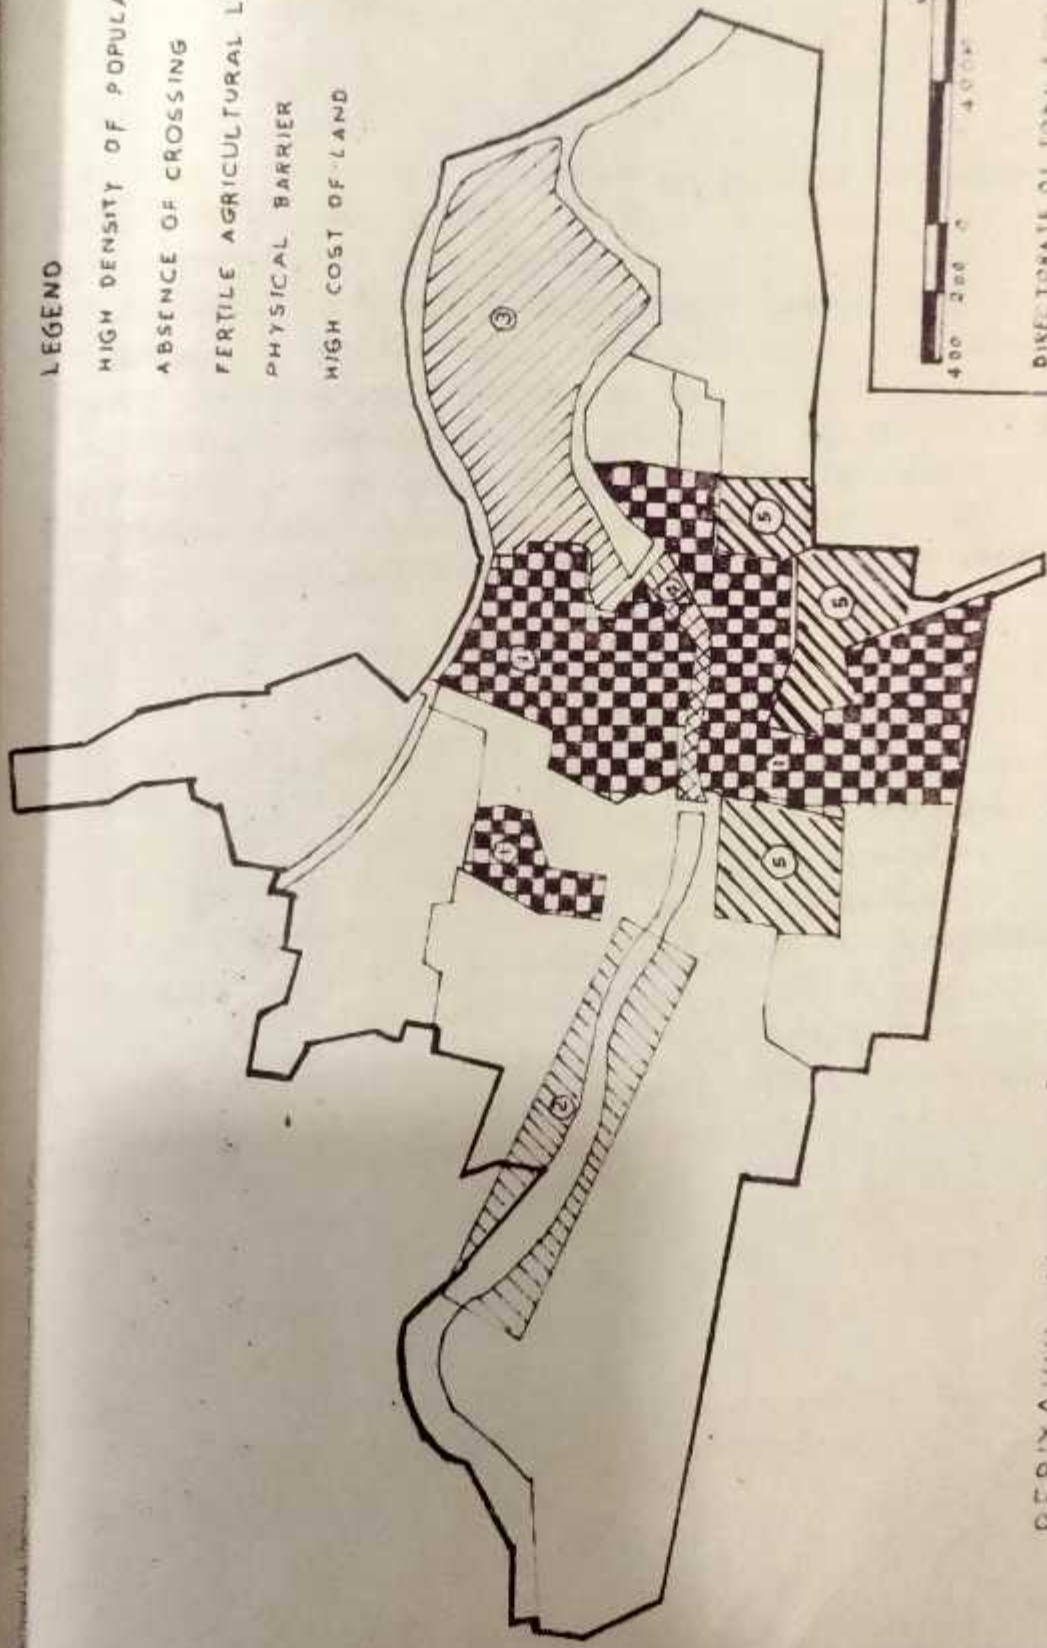

9. There is a conspicuous absence of industrial activity in this town. The availability of land might also be a contributing factor for this draw back.

1.5.00. The town is a Taluk Headquarters town. The Periyakulam taluk covers 3 towns and 52 villages. The extent covers to 1,74,622.00 hectares. The Periyakulam town's administration is under the Municipal body which was constituted in year 1886. The town's extent is 2.10sq.km. The Town Planning activities are controlled and regulated by Town and Country Planning Act of 1971 and Local Planning Area constituted merges with the Municipal boundary. The Municipal Council becomes the Local Planning Authority and the Commissioner has been appointed as Member-Secretary.

1.6.00 The District Regional Plan prepared by the Department of Town and Country Planning, has identified twenty growth centres for this Madurai district and Periyakulam is included as one of the growth centres. The growth centre is 3rd order in heirarchical pattern of urban settlements as evolved by the Regional Planning Policy (based on 1971 Population as 41,561). This town will emerge as service and marketting centre to serve for the population in and around this town.

PERIYAKULAM LOCAL PLANNING AREA

DIRECTORATE OF TOWN & COUNTRY PLANNING
GOVERNMENT OF TAMIL NADU

CHAPTER II

2.00.00 SCOPE FOR URBANISATION:

2.1.01. ENVIRONMENTS:

Periyakulam town is one among century old town in Madurai District and is ranked 7 in respect of the size. This town has been constituted as Municipality, a century ago and it enjoys a status of a taluk headquarters. Being at the foot of the Kodai hills this acts as a collection and distribution centre for agricultural and plantation products. Kodaikanal, Veigai Dam and Kumbakaram are the important recreational centres serving the District and the State and Periyakulam town is close to all these centres. It has an impact of the growth and development neighbouring town namely Theni Allinageram which is an important commercial town and famous for market for cotton and agricultural products which are exported to other States in the Country.

2.1.02. The study of the profile of the town reveals that it has developed in a linear pattern along the course of the river Varahanathi. The residential houses within, the old pockets of the town have sprung up on both sides of river have been built abutting narrow lines, the widening of which will be a difficult task. The commercial units which have come up, got roots in southern part of the town and have spread along the major roads connecting the neighbouring towns. The service facilities and institutional uses are also scattered in this town. The transport terminal is located on the northern part. The town being a taluk headquarters, the public offices like Revenue Divisional Officer's Office, Court, Public Works Department Office etc., have been located on the southern bank.

The roads are meant for mixed traffic and many stretches are narrow and are disorganised.

2.1.03. LIMITATION DUE TO NATURAL FEATURES:

The town's structure depicts two distinct parts one viz., Vadakerai and the other viz. Thenkerai which are Tamil version of areas lying on north of river and the other on south of river. This shows that river plays a significant role in bisecting the town's activities. The northern part of river is the concentrative of residential houses and the southern part is basically a mixed zone consisting of residential, commercial and administrative activities. The river acts as a barrier for mutual linkage and two bridges have been constructed across the river.

2.2.00. The population as per 1981 census comes to 44310. The District Regional Plan has identified this town as a growth centre and future population is assessed to be 52000 in 1991, 59,000 in 2001 and 67,000 in 2011. The present overall density works out to be 440 persons per hectare of town area (excluding the non-urban use). The desirable density is assumed to be 350 persons per hectare. This poses a problem for finding an alternative residential area to an extent of nearly 19.50; 15.50, 21.50 hectares in 1991, 2001 and 2011 respectively to accommodate the increase in population over the decades.

2.3.00. The agricultural use occupies 43.2% in the Town's usage and the predominant agricultural operations are coconut plantation and gardens and paddy cultivation. The area of coconut plantation and rice cultivation cannot be taken up for urban uses as it would affect the production of rice and coconut. The areas immediately surrounding this town also form part of fertile agricultural belt.

2.4.00. The town is developing along east-west direction in a linear fashion and commercial activities are prominent with few industries.

Planning area consists of 3 tanks and agricultural fields and any development has to be done at the expenses of rich agricultural fields. Absolutely there are no new developments on the west owing to the high cost of lands.

The protected water supply is made available for this town from 1912 taking water from Berijan lake at the rate of 25 gpcd. This needs improvement. The disposals are let into the river Varshanadhi haphazardly at many points within the town area creating unhealthy atmosphere and pollution in water which needs check and preventive measures. Also the roads in the midst of the town area (Example: Mahatma Gandhi road) are very narrow and both sides of them are thickly built up and widening of roads are hardly possible. There is no underground drainage system for this town and the existing open drainage system needs further improvement. But the city is divided by this river, and the cost of provision of underground sewage will be comparatively higher.

2.5.00. The existing uses on either side of the river Varahanadhi are with full of coconut gardens and nurseries which needs preservation and hence the possibility of planning roads on banks of river will hardly be possible.

Many of the important developments (construction of Arts College) have taken place beyond the administrative limit. The Local Planning Area confines to the administrative borders of the Municipality and therefore is to be extended to include Vadakarai, Kilvadakarai, Thenkarai and Thanaraikulam.

2;6.00. The town with all its capabilities both at present and in future will have enough scope to emerge as a agricultural and commercial centre. A few service units like rice bulking and agro-based service units may add to the towns industrial activity. The study of the economic potentials shows that there is no possibility for starting new industries within the Planning Area. The plan has to be aimed at for the growth and development of the town as a residential and a commercial centre. The service activity could be organised to cater to the needs of the town and villages lying around.

CHAPTER - III

3.0.00 PLAN OBJECTIVES:

The following objectives are included in the planning of Periyakulam Town.

3.1.00. PHYSICAL LAND:

Nearly 40% of town's use is occupied by agricultural use wherever possible the potential agricultural lands are reserved and only less potential lands are taken up for urban uses.

3.2.00 The community involvement is negligible in the town's development. The constitution of Local Planning Authority with the members of town with whom the planning and development will be enrolled would provide ample scope for participation in decision making. The pooling of private investment will be influenced by ear-marking industrial and commercial uses under Detailed Development Plans and improving the new network.

3.3.00. The activity planning is proposed to regroup the existing residential uses, commercial uses and required infrastructures will be provided in the plan.

3.4.00. The industrial activity is not significant in this town and hence provision is made for promoting this activity.

3.5.00. The river crossings are provided at two parts and this is considered as enough for the present and future.

3.6.00. The community participation is totally absent since is no provision in the town. The creation of organised parts, open space and social clubs will create opportunities for social gathering. Building a better community will be the national asset. The plan objectives includes creation of community centre to promote this activity.

3.7.00. The plans aims at providing an organisation responsible for co-ordinating and monitoring the planning activities. The Town and Country Planning Act of 1971 provides for the constitution of Local Planning Authority for this town Local Planning Authority has been constituted and it is functioning at present.

CHAPTER - IV.

4.00.00. POLICY TOOLS:

4.1.00. LAND DEVELOPMENT POLICY:

4.1.01. The ultimate population for the town is 1991, 2001, and 2011 is assessed to be 52,000, 59,000 and 67,000 respectively. It is proposed to reduce the overall density from 440 persons per hectare which is existing to 350 after the next 3 decades of implementation of Master Plan. The overall requirement of land for urban uses will be assumed 138.80 hectares, 154.30 hectares and 175.80 hectares at the end of next 3 decades. This is shown in the following table.

Sl No.	Decades	Total land required	Existing	Additional land required.	Overall density per hectare.
			(all in hectares	..)	hectare.
1.	1981-1991	138.80	119.30	19.50	390
2.	1991-2001	154.30	138.80	15.50	370
3.	2001-2011	175.80	154.30	21.50	350
			Total	56.50	

4.1.02. The total extent of the town is 210 hectares out of which 90 hectares (i.e.) nearly 43.18% is occupied by lands put into agriculture land under water and vacant lands. This shows a considerable amount of land within urbanisable limit is left to non-urban uses. The development policy will have to include the following.

1. Preservation of potential agricultural lands. (coconut thopes only)
2. Wherever possible the less profitable agricultural dry land and vacant lands shall be brought for urban uses when the town demands it. With above said policy frame work the lands required for future urban uses are worked out and tabulated above.

4.1.03. DEVELOPMENT AREAS:

General areas of the town shown in Map no. DTCP/M/84-MR/MP/10/84 is thickly populated area and hence it is designed for improvements. The residential pockets in Vadakarai and mixed land uses in the Thenkarai require

redevelopment and regrouping. The redevelopment involves the renewal of old delapidated structures and constructed their places. The regrouping is aimed for consolidating the non-residential uses like Commercial and Service industries. The improvement measures are suggested to make the old developments fit for modern living conditions. The preparation of Detailed Development Plans will provide opportunities to identify the problem areas and also plan for remedies. Before taking up this plans detailed studies are essential and they will be formed after the publication of Master Plan.

The lands already covered under Sanctioned Detailed Development Plans (within Local Planning Areas only) are considered to be the potential areas for immediate development. The lands on the south, lying on the Thenkerai Extension Detailed Development Plan, lands abutting the southern boundary of the Local Planning Area and lands on the eastern part of the town and lands lying in between Varahanathi river and Andipatti road are reserved for urban uses in First phase.

The lands lying on the Western boundary of local Planning Area and southern portion of Chottuparai road, either side of Varahanathi river in the middle of the town and southern portion of channel are ear-marked for the developments in II and III phases. The additional area required is taken within the Local Planning Area itself for future developments. The lands ear-marked for development in First Phase will be left to the private developer by building necessary infrastructure through the implementation of Detailed Development Plans.

The land values within the control pocket is in the range of Rs.50/- per square metre and in the periphery Rs.30/- per square metre.

4.2.00. ECONOMIC DEVELOPMENT POLICY:

4.2.01. The economic activity of the town centres around agriculture and trade. The trade units cover only retail trade and there is no much significance attached for the expansion of these whole-sale trade in this town.

There is a good scope for industrial activity if lands and other facilities are provided and this could be considered only when the adjoining dry belts lying adjacent to Periyakulam-Theni road are included with the Local Planning Area. There are signs of industrial growth along this traffic route. As such there is no possibility to expect major industrial activity within the Planning Area but however an area on the northern corner and adjacent to Madurai road has been set apart for accommodating service industries and agro-based industries.

4.3.00. COMMUNITY DEVELOPMENT POLICY:

The community participation is a must in a town's developmental activities. But this is totally absent in this town. There is no infrastructure built in. It is one of the objectives of this plan to create a community centre. There is no space available within the proposed bus stand.

4.4.00. STANDARDS OF URBANISATION POLICY:

4.4.01. WATER SUPPLY AND DRAINAGE:

The present water supply system is being continued as per the scheme assigned in the year 1903. The average consumption of water supply previously was 60 litres. The domestic water supply for Periyakulam was supplied at the rate of 75 litres per head per day from 1905. Now the Government have executed a new scheme at the cost of Rs.37.50 lakhs and this is functioning from 10.9.1977.

The town is not provided with underground drainage system. Apart of the sewage is cleared by the carts and the rest of the sullage and sewage water is let into the river Varahanathi which runs in the centre of the town.

A comprehensive drainage scheme is pending finalisation by the Government. If the scheme is finalised and executed the pollution of river water will be avoided.

Since Periyakulam is not an industrially developed town, the discharge from the industrial waste is not a problem confronting the local authorities at present.

Now the Government has sanctioned an amount of Rs. 21.96 lakhs for the drainage scheme in G.O. 1685 dated 29.9.1972 and the same is to be adopted yet. The water Supply and Drainage Board, a Quasi-Government agency is taking up this job and the distribution mains are being laid and the reservoir has been built and hence no new land areas is required for this.

4.4.02. TRANSPORTATION:

The roads are the only means of communication system. The roads of the town are too narrow except those stretches connecting Periyakulam-Theni road and Periyakulam-Batlagundu road. The internal roads are too narrow and most of them can carry only slow moving vehicles and pedestrians. The river Varahanadhi acts as a traffic barrier. Two bridges and one foot bridge have been constructed across the river.

There is a need for improving the roads along the banks of the river and for filling the missing links. There is also a need to connect Batlagundu and Theni road which would help to ease the conjection within the town. This has been included in the Development policy. Many of the old roads have been proposed to be widened or improved. The bus terminal is functioning on the north end it is inadequate hence decided to shift it to a location on the eastern end of the town.

4.4.03. HEALTH:

The health needs are served by the Government. Hospital with the bed strength of 50 at present. The out-patients facility is also available. Hence no provision is made for location of hospital in the plan. But however a few health clinics are proposed to be included in the Detailed Development Plans.

4.4.04. HOUSING

Housing is an important factor which influence the health, happiness and general well being of the people to a greater extent. Assuming a size of 5 person per house-

HOUSING DENSITY 1983

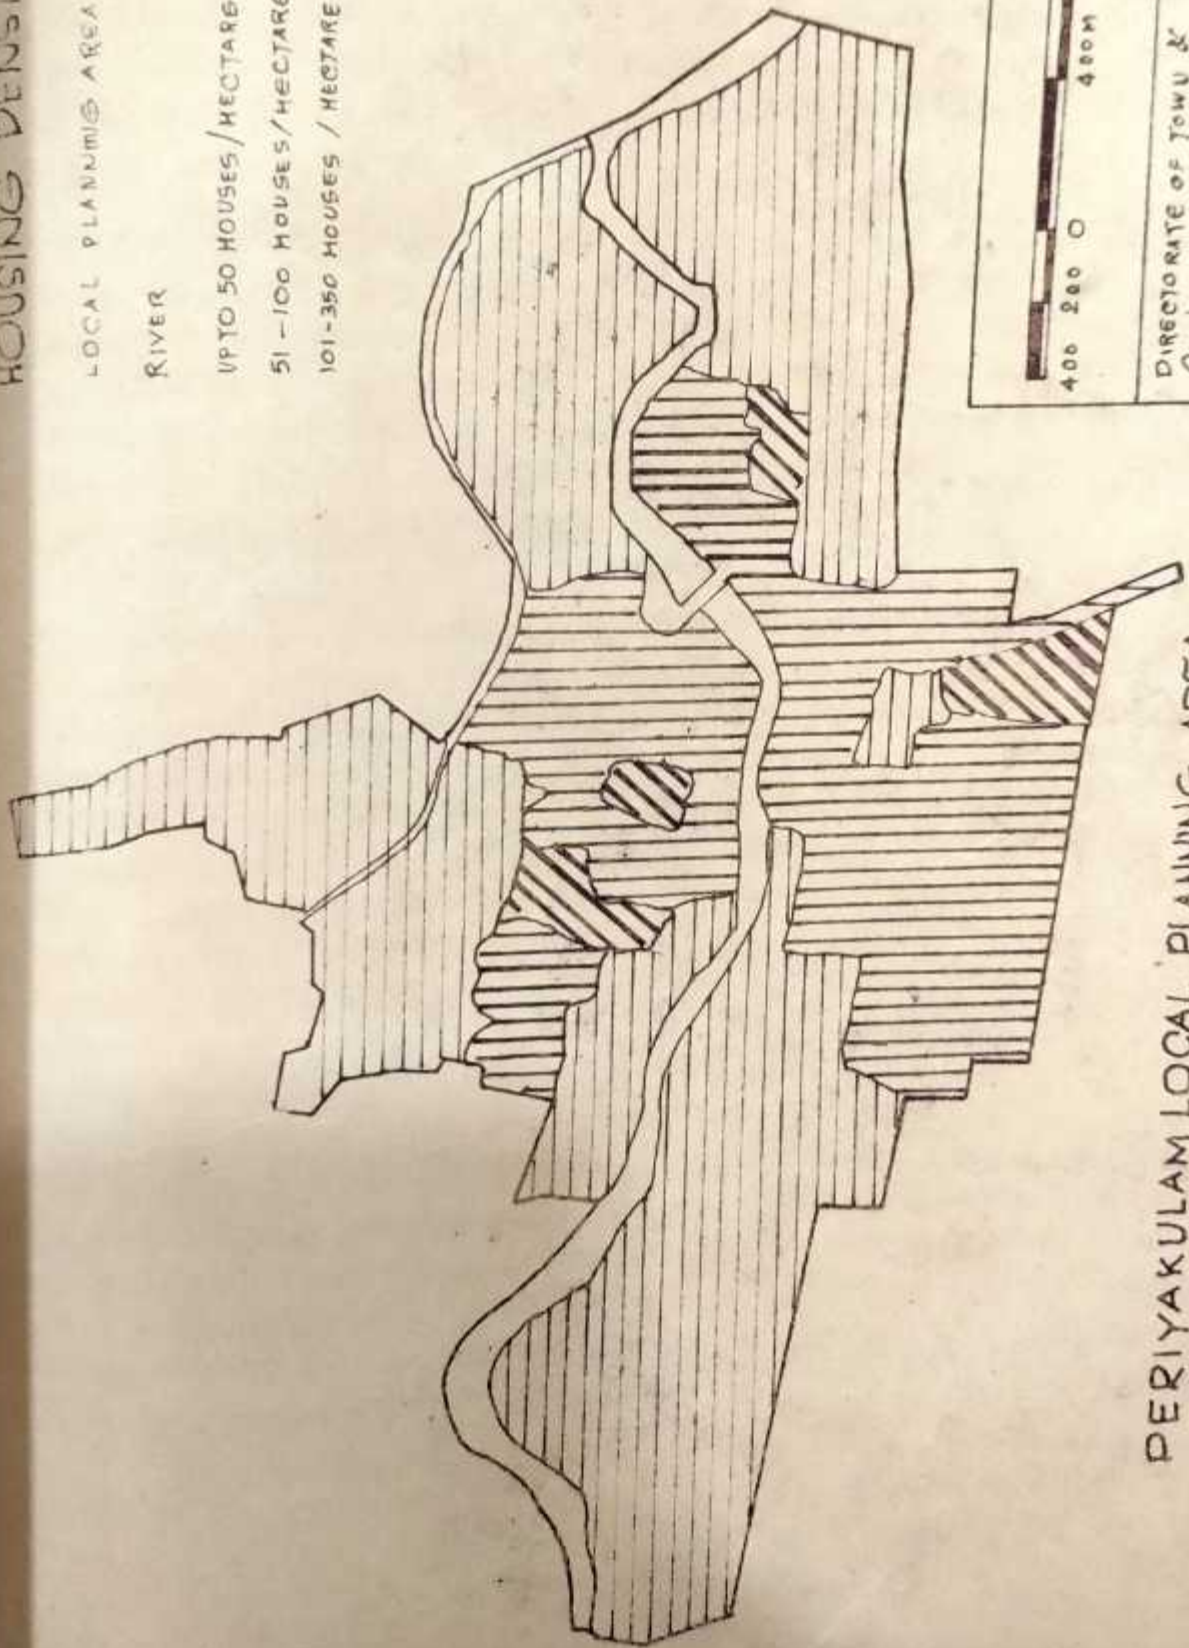

LOCAL PLANNING AREA BOUNDARY

RIVER

UP TO 50 HOUSES / HECTARE

51 - 100 HOUSES / HECTARE

.. 29..

hold, the houses required in 1991, 2001 and 2011 will be 10,400, 11,800 and 13,400 respectively. The existing housing stock is 5,377 as against 7,616 households (1965). This works out to be 1.4 households per house. The following Table provides the requirement of the additional stock of housing units over the coming decades. The future requirement is worked out with the standard of 1.25 households per house as a basis.

4.4.05. OTHER SERVICES:

The provision of other services like Postal and Telegraphs, Telephone, Fire Service, Police Stations etc. is made at the rate of 0.1 hectare for every 1000 population and the land is not specifically allocated by included in the area reserved for public and semi public.

4.5.00. ADMINISTRATIVE POLICY:

The town's administration is looked after by the Civic body (i.e.) Periyakulam Municipality. The Planning and execution of the projects under planning is entrusted to an Authority called the Local Planning Authority" which is constituted for Periyakulam by the orders of the Govt. in G.O.Ms.no.650, Rural Development and Local Administration dated 8.4.1975. The powers are delegated by the Town and Country Planning Act of 1971 to investigate the formulate schemes to the requirement of the town for both present and future. The Periyakulam Local Planning Authority will have its own funds created with both internal and external resources and hence this body is considered to be sufficiently enough to implement the Master Plan.

The provision of services like Housing and water supply are looked after by the Tamil Nadu Housing Board and Tamil Nadu Water and Drainage Board. The buildings which require technical assistance are entrusted to State Public Works Department. The Local Planning Authority may utilise the assistance and services from these agencies.

Table 14.

DECADAL WISE HOUSING REQUIREMENT

Sl.No.	Decades	Population estimated	No. of household at 50 per household	No. of dwellings required.	No. of dwellings actually required	Existing Housing stock.	Additional requirement.	Land required at 50 units per hectare
1.	1981 - 1991	52,000	10,400	10,400	8,320	8,000	320	06.41
2.	1991 - 2001	59,000	11,800	11,800	9,440	8,320	1,120	22.40
3.	2001 - 2011	67,000	13,340	13,340	10,672	9,440	1,232	24.64

- * - (1) It is assumed that the average of House-holds per residential unit will be 1.25.
 (2) Higher dwelling densities is assumed (ie. 50 dwellings per hectare) for the areas to be newly developed for residential as there is scarcity of non agricultural land within the town.

CHAPTER V

5.0.00. PROGRAMMES FOR IMPLEMENTATION:

The action programmes are essential for successful implementation of the Master Plan. The act requires preparation of Detailed Development Plans for development of specific areas. The town will be divided into viable zones and these zones will be covered under the Detailed Development Plans. These zones will be developed by preparing Detailed Development Plans as guided by the Town and Country Planning Act.

The action programmes will emanate only from the Detailed Development Planning and hence left to the detailed survey and decision by the L.P.A. who should follow up this Master Plan.

EDUCATION: Students age group projection at the rate of 40 for 0-14 age group and 32.4% for 15 - 34 age as adopted 1961 Census particulars.

ABSTRACT

LOCAL PLANNING AUTHORITIES - Composition of Local Planning Authorities which comprises of single local authority - Ordered.

RURAL DEVELOPMENT AND LOCAL ADMINISTRATION DEPARTMENT.

G.O.Ms.No.651

Dated 8th April, 1975.

Read:

G.O.Ms.No.650, RD&LA, dated 8.4.1975.

ORDER:

In the G.O. read above, Government have constituted Local Planning authorities under the proviso to section 11(1) of the Tamil Nadu Town and Country Planning Act, 1971 in respect of Local Planning areas declared under section 10 of the said Act.

2. According to the proviso to sub-section (1) of section 11 of the Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972) in case where the local planning area consists of the area under the jurisdiction of a single local authority, the Government may declare such local authority as the local planning authority for that area. Sub-section (3) of the said section 11 provides for appointment of the Chairman Members and Member-Secretary for the Local Planning authority other than the local authority, which has been declared as the local planning authority under the sub-section (1).

3. The Government clarify that on the declaration by the Government of the single local authority as local planning authority under the proviso to section 11(1) of the Act, the Chairman, members and executive authority of the local authority shall automatically become the Chairman, members and the executive authority of the local planning authority concerned.

4. A list of single local authorities which have been declared as local planning authorities under the Act is appended to the order.

5. The Director of Stationery and Printing is requested to publish this order in the Tamil Nadu Government Gazette.

(BY ORDER OF THE GOVERNOR)

Sd/-BAL.SUBRAMANIAN
Secy. to Govt.

// True Copy //

APPENDIX

List of single local authorities which have been declared as local planning authorities under the proviso to sub-section (1) of section 11 of Tamil Nadu Town and Country Planning Act, 1971.

DEVELOPMENT CONTROL RULES

These rules may be called Development Control Rules which form part of Master Plan prepared for Periyakulam under Section 17 of Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972). These rules are to be made for the regulation of various land uses which are grouped use-zone wise (Vide O.No. 1730 RD&LA dated 24.7.74). For this purpose of regulation of uses, the areas in the proposed land use plan has been divided into a number of use-zones. Such Zoning regulations should, by this very nature, promote orderly development on the best interest of the urban community. Each use zone has its special regulations because a single set of regulations cannot be applied to the entire town, as the different use zones vary in their character and function.

SANCTIONED DETAILED DEVELOPMENT PLAN

In so far as the areas covered under Sanctioned Detailed Development Plans are concerned the Rules and Regulations of Detailed Development alone will apply.

<u>SANCTIONED DETAILED DEVELOPMENT PLAN</u>	<u>Colour Reference</u>
<u>I. RESIDENTIAL USE ZONE - Use Zone - I</u>	Yellow
(a) Primary Residential Use zone	"
(b) Mixed Residential Use zone	"
<u>I. COMMERCIAL USE ZONE - Use Zone II</u>	Dark Blue
<u>Industrial Use Zone - Use Zone III</u>	Violet
(b) Mixed Industrial Use Zone	"
Uses, per 44	"
(c) Special Industrial Use Zone	"
<u>Use Zone</u>	Orange
<u>IV. Educational - Use Zone IV.</u>	Red
<u>V. Public and semi-Public-Use Zone V</u>	Green
<u>VI. Agricultural - Use Zone VI</u>	

Permissible uses in Use-Zones

The uses permitted in different use zones are given in the following Table.

Control of Development and Land use Zoning Regulation

USE ZONE

I. Residential Use Zone

(a) Primary Residential Use Zone

Uses permitted

1. All residential buildings including single and multi family dwellings, apartment dwellings and tenements together with appurtenances pertaining thereto;
2. Professional consulting offices of the residents and other incidental uses therefor;
