## **CHAPTER 2**

### **Assessment and land requirement**

#### **Problems identified**

2.01 Vadakku Valliyoor town panchayat is important because of its ideal location i.e. along NH 7 in between Tirunelveli and Nagercoil. It is also a marketing centre and having its own influence over the surrounding villages. Though the town attracts the villages people much, the town itself is not having adequate facilities. Further the special and major Defense Navel Communication Centre as Skylark and other major National Navel Project Plan, Liquid Propulsion System Centre and the Automatic Power Centre are located very near to this town at Vijayanarayanam, Kavalkinaru, and Koodankulam respectively. Considering the above factors the need for the population planning period could be assessed. In the object of studies so far made is to design and prepare a master plan which will serve as a physical frame work for regulating the future development of Vadakku Valliyoor town for the purpose this master plan, the design and prepare a master plan, which will serve as a physical frame work for regulating the future development of Vadakku Valliyoor town for the purpose this master plan, the design is period taken as 2011 based on the trend of population growth. The estimated population will be about 35600 by the year 2011.

2.02 Usually the land area required for different land uses for future expansion will be worked out based future population and floating population under various occupational groups. Here it is suggested that there existing land use pattern taken as a guide line for assessing the future land use is consider to be satisfactory unless otherwise there is a radial change in the character of the town.

## **Proposed land use zones**

### **Residential use zone**

2.03 Residential part of Vadakku Valliyoor has developed in a particular place i.e in the Vadakku Valliyoor hamlet itself. The core of the residential development in Vadakku Valliyoor has been developed with different uses mingled it one another and with high residential density considering the present trend of growth and preserving the wet lands wherever dry land exist and close to the residential area. The area along the Kesavaneri road and adjoining land to Pottavadi have been earmarked as residential uses. All the residential area are classified under mixed residential use.

### **Commercial use zone**

2.04 In Valliyoor there is no organised daily market, one weekly sandy is functioning on Friday. In both sides of Tirunelveli Nagercoil road and Radhapuram road a number of shops of different kinds are studded with other developments. Regulated market which deals with agricultural produces is located in this town.

Major commodities in this area are different types of banana fruits, standard chamber bricks, roof riles and floor tiles. Vadakku Valliyoor is also marketing centre for the surrounding villages.

As explained in the previous para most of the commercial uses had developed along NH 7 and Radhapuram road. Only a few commercial use buildings are located inside the residential locality. The total land required for commercial uses has been suitably distributed in all the existing development and in the proposed development where existing trend of commercial activity along the road are considered and certain percentage of additional area reserves for commercial activities are also provided along those roads by increasing the depth of commercial activities i.e. 30m both sides of NH 7 Radhapuram road and Ervadi road for the S.No. mentioned as part with inclusive of full survey numbers also mentioned.

As Vadakkuvalliyoor play a vital role in marketing centre for agricultural commodities to the surrounding villages the area for commercial uses allocated is 56.29 hectares.

### **Industrial use**

2.05 From the existence it is found that there is no major industries in this town to promote industries, industrial layouts may be proposed by SIDCO and encouragement to be given to the entrepreneurs for setting out small industries including Agro based industries. Considering the above the industrial area is earmarked in the master plan is 12.94 hectares.

### **Educational Use**

2.06 From the existing availabilities it is ascertained that an Arts and Science College and a Polytechnic are to be located to cater the needs of the people including surrounding villages. Considering the future needs the educational area earmarked in the master plan.

### **Health Facilities**

2.07 To improve the medical facilities the bed strength in government hospital is to be increased and the building is to be expanded or may be provided in a new campus. The advanced medical facilities may also be provided. To provide the above facilities the required area is also included in public and semi public use.

### **Transportation**

2.08 Considering the existence of roads and traffic flow the following aspects are decided.

- (1) The main roads i.e. NH 7 and Radhapuram road need not require any widening or upgrading during the planning period.
- (2) The roundana at the Junction of NH 7 and Eruvadi road should be maintained properly.

- (3) The Kesavaneri road may be widened to a depth of 60 and upgrade.
- (4) Proper parking space should be provided for mini vans and trucks.
- (5) The encroachments along NH 7 and Radhapuram road has to be removed.
- (6) The existing NH 7 satisfies the present and future traffic requirements during the planning period and to provide for formation of bye pass road does not arise.

### **Water supply**

2.09 The water supply at present is inadequate to the existing population. During summer it is found heavy shortage of supply for drinking purpose. To avoid this it is suggested by local authority to bring the water form the well at Kodumudiyar river at a distance of 12 km away from Valliyoor. It is also ascertained that if this people throughout year will be at a minimum of 50 lpcd.

### **Drainage**

2.10 There is no organized drainage facility are available in this town.

Existing open drains should be maintained properly by taking repair works and storm water drain to be constructed. In the newly developed area underground drainage system has to be implemented.
