## CHAPETER. 2.

2.01. The existing residential development of the town has come up mainly on both sides of the existing roads. At present the water supply is not adequate for the whole Town.

2.02 The economy of the town is based on primary and tertiary activities. The growth of the town will also be depending on improvement in economy. Till then the town will exist at present condition.

2.03. The present road net work pattern is in existence from 1951. Few roads were formed in the past few decades. This may be the reason for the less development of the town. All major roads are motorable. The available other streets are too narrow resulting lesser changes of the scope of development of further residential and other uses. So proposal of widening of existing roads and street may be thought of.

2.04. The town consists of more dry lands and lesser wet lands. Most of the dry lands are put into use as thopes, which elides money. The wet lands get irrigation from the Thambraparni River. Most of the dry land is an favorable factor for the land scope of expansion.

## CHAPTER. 3.

### PLAN PROPOSALS:

3.01. Kuzhithurai Town is a small town. It is more or less centrally located between Nagercoil and Thiruvananthapuram. The town consists of cultivable land and thopes. Development came up along the roads on both sides. As seen from population growth table, the population growth is decreasing.

3.02. The objective is to optimize the use of lands and resources available with that of man power so that more employment opportunities can be generated. It is also necessary to promote handicraft, cottage and rural industries as well as agro based industries to improve the working force in the field of construction, roads, building maintenance, trade and commerce.

3.03. The objectives also include changing the social structure to have a uniform infrastructural facilities and creating a better and healthy living environment and to improve the standard of living by optimum use of natural and human resources. The objective is to further provide ample and attractive sites for the all socio economic group, encouragement of efficient and commercial distribution of shopping, socio – culture and recreational facilities, provision of attractive sites for offices, health and educational institutions etc., good net work of roads and streets, so that people can easily travel around the area to ensure that adequate services are provided to the people, to encourage individuals to develop their fullest capacity through provision of amenities to serve effectively as service centre for the rural settlements surrounded by the town.

### 3.04. POPULATION FORECAST :

Assessments of land requirements for various urban needs are assessed based on the population projection. In the assumed planning period 2021, the development of the town may expand its present limit of development. So to arrive at the population in 2021 the present population of the town and its growth are considered generally.

Year	Population	Increase	Variation
1971	16198	--	--
1981	18427	2229	13.76 %
1991	19226	799	4.33 %
2001	20503	1277	6.64 %
Total		4305	24.73 %

Population projection is attempted by the following three methods.

### 3.05. BY ARITHAMETICAL METHOD:

$$\text{Average increase} : 4305/3 = 1435$$

$$\text{Population forecast for the year} :$$

$$2011 = 20503 + 1435 = 21938$$

$$2021 = 21938 + 1435 = 23373$$

### 3.06. BY GEOMETRICAL INCREASE METHOD:

$$\text{Average increase } 24.73/3 = 8.24 \%$$

$$2011 = 20503 \times 1.0824 = 22192$$

$$2021 = 22192 \times 1.0824 = 24020$$

### 3.07. BY INCREMENTAL INCREASE METHOD:

$$\text{Average incremental} = (183+1430)/2 = 807$$

$$\text{Average Arithmetical increase} = 1435$$

Future population for the year

$$2011 = 20503 + 807 + 1435 = 22745$$

$$2021 = 20503 + (2 \times 807) + 1435 = 23552$$

### 3.08. FUTURE POPULATION:

Method	Future population for the year	
	2011	2021
Arithmetical method	21938	23373
Geometrical increase method	22192	24020
Incremental increase method	22745	23552

3.09. The population arrived at by the Arithmetical method gives average result and it is to be adopted by large cities which have particularly reached the maximum Geometrical increase method gives better result for old cities which are not undergoing future rapid development. The incremental increase method gives low population projection and hence not adopted. So population projection and hence not

adopted. So population for the year 2011 and 2021 as calculated by Geometrical increase method can be taken into consideration for planning purpose. The Directorate of Town & Country Planning has worked out the urban population of various towns in Tamil Nadu based on the urban trend analysis and for Kuzhithurai, they have worked out that 25000 will be population during the year 2021 and so this figure has been taken for study purpose.

### PROGRAMME FOR IMPLEMENTATION:

#### 3.14. URBAN RENEWALS:

Regarding Urban renewal, remodeling the entire existing development is not suggested due to abnormal financial requirement. It is also not necessary in this town. Street alignment of arterial and sub – arterial roads and major roads have alone to be proposed.

#### 3.15. NEW DEVELOPMENT:

This include residential, commercial, industrial, educational, public and semi public and agricultural uses and areas proposed for each zones are shown in Map No. 3.

#### 3.16. HOUSING:

Newly proposed residential area may be acquired by the Local Planning Authority or by the Housing Board and after developing the sites so acquired the developed plots can be allotted to the public or Housing agencies

themselves can construct houses of different types according to the needs and requirements then and there. For economically weaker sections principle of cross subsidy may be applied.

3.17. New areas proposed for commercial development may be acquired and developed by Local Planning Authority itself and can make profit out of the remunerative schemes that may be proposed in this zone.

**3.18. EDUCATIONAL USE:**

The existing educational institutions are enough to meet out the requirements of future population also. But most of the schools are concentrated at the eastern of the river. ie., Marthandam and Thoduvatty. So one more high school is proposed in western side of river for the anticipated population.

**3.19. PUBLIC AND SEMI PUBLIC USE:**

Agricultural activities and service cum commercial activities are the main activities of the town and shares equally. Next educational activities followed by public and semi public uses. The offices at present are located in different places, mostly in private rental buildings. The additional ones provided for public uses, which include public offices, religious places, medical institutions and transportation, which will be developed by the concerned institution.

**3.19. AGRICULTURAL USE ZONE:**

Normally wet lands are not used for any urban development, except in an extraordinary case like bye pass etc. Only dry land will be

taken for urban development proposals. For Kuzhithurai also, dry lands have been taken for future needs as shown in the proposed land use map.

### 3.21 **TRANSPORT AND COMMUNICATION:**

Land for new roads and streets may be acquired and developed by Local Planning Authority as and when the development occurs.

### 3.22 **WATER SUPPLY, DRAINAGE AND SEWAGE:**

Water supply and drainage scheme for the anticipated population can be implemented by Tamil Nadu Water supply and Drainage Board after assessing the needs.

### 3.23 **PLAN IMPEMENTATION:**

Plan implementation require the active co-  
corporation of tax payer, local citizen, business scope, industrialists and Government officials. Mobilisation of strong public opinion in favor of the aims and objectives by utilising mass media of propaganda is necessary.

3.24. Discussions and debates in the public meeting and utilising present public opinion could be gathered in solving the problem of implementation if any. By mobilising strong public opinion in favor of aims will make implementation process easier.

3.25. Kuzhithurai Local Planning Authority is surrounded by Kodumkulam hamlet in the eastern side, Vilavancode village in the western side, Chennithotam, Mathilakam, Nanthancode hamlet in the southern side and Palamkatti hamlet in the northern side.

They are very close to Kuzhithurai town where developments take place. Though those separated by administration, it seems that the developments are part and parcel of the town.

The people living in these hamlets are coming to Kuzhithurai town for all their needs.

So it is suggested that the above hamlets situated in Revenue village of Nallore, Vilavancode and Pacode may be merged with Kuzhithurai L. P. A. and it may be upgraded as composite L. P. A.
