# ARCOT MASTER PLAN (MODIFIED)

## PART - I CHAPTER - I

### INTRODUCTION

- 1.1. The rate of urbanization is increasing day by day due to increase of population and also due to migration of population from villages to urban centers seeking gainful employment. The problem of urbanization can best be solved only by preparation of Master Plans, which may be regarded as means of systematically anticipating and achieving adjustment in the physical environment of the town consistent with social and Economic trends and sound principles of civic design. It involves a continuous process of deriving, organizing and presenting a broad and comprehensive programme of urban development. It is designed to fulfill local objectives of social, economic and physical well being considering both immediate needs and those of foreseeable future.
- 1.2. The Tamil Nadu Town and Country Planning Act 1971 (Tamil Nadu Act 35 of 1972) provides for the preparation and sanction of Master Plans. It also envisages the Local Planning Areas and authorities for the preparation of Master Plan. Arcot Municipal Area has been declared as Arcot Local Planning Area under Section 10(4) of the Act in G.O.Ms. No. 667 R D & L A Dt. 16-3-74 and Local Planning Authorities have been constituted under Section 11(1) of the Act in G.O.Ms. No. 652 R D & L A Dt. 8-4-75.
- 1.3. The Arcot Master Plan was prepared for the plan period 1981 - 2001 and approved by the Government in 1993 under Section 28 of the town and country planning Act 1971 in G.O.Ms. No. 111 H & UD Dt. 5-2-93 and the same is in operation now.

- 1.4. The Act provides for review of approved Master Plan, once in five years under clause (b) of subsection 2 of section 32 of the Tamil Nadu Town and Country Planning Act 1971. Accordingly the Government fixed target for the year 2001 – 2002 and have directed the Arcot Local Planning Authority to review the Master Plan for Arcot Local Planning Area, which was already approved by the Government, after carrying out such fresh surveys as may be considered necessary and in consultations with the regional office and Local Authorities concerned and to make such modifications wherever necessary and submit the modified master plan for the approval of the Government.
- 1.5. The approved Master Plan was prepared based on the Surveys conducted during 1984 and also based on the 1981 census. Hence, fresh surveys have been undertaken and the latest particulars have been collected from different sources and the report is updated with 1991 & 2001 census figures.
- 1.6. This report has limited scope as it indicates broadly the general problems of the planning area and the broad policies of development, Detailed plans focusing attention as particular aspect and detailed design for each aspect of the proposal will have to be taken up separately based on the broad proposals out lined in the report.

## CHAPTER – 2

### HISTORY AND GROWTH OF TOWN

#### LOCATION

2.1 Arcot being the headquarters of the Arcot Taluk, is located on the southern banks of river Palar, at 12° 54' northern latitude and 79° 19' eastern longitude. It is along Ranipet – Krishnagiri National Highways (N.H. 46) and is located about 116 Kilo Meters West of Chennai and 23 Kilo Meters East of Vellore Town.

#### HISTORY

2.2 The name 'ARCOT' now applied to the town in which Nawabs of the Carnatic held their court seems originally to have referred to a large tract of country lying on either side of Palar river. Legend says that here six 'Rishis' or religious ascetics are fabled to have lived a life of penance in the jungle tracks of wilderness called in Sanskrit the 'Shaderays' or six forests. The Tamil equivalent was 'Aru Kadu' when came the name 'Arcot'.

2.3 Arcot is a place of historical importance, this place has changed hands and was in the possession of the British, the French and Hyder Ali in turns. In 1687, the Emperor Aurangzeb sent his general Zultiar Khan to bring the extreme south or North Arcot District under the Aurangzeb Rule. Nawabs of Carnatic made Arcot their Head Quarters. In 1749 Robert Clive captured Arcot on behalf of Mohammed Ali. Arcot became the capital of the newly proclaimed Nawab Chanda Sahib. On the renewal of the war in 1757, Arcot fell to the French. In 1780, Hyder Ali of Mysore descended the ghats and besieged Arcot. When he heard that the British army under Sir Hector Munro was on its way to Arcot, he abandoned the attempt. He afterwards resumed the siege of Arcot, which again surrendered to British. Since then till 1947, Arcot remained under the British.

- 2.4 Arcot has developed into a trade center and is connected with Chennai by National Highways Road. The railway station located in Walaja road is the near by railway station from Arcot. Important places of attractions of Arcot are the Delhigate, the Marbic pond, the Sadhullakhan tomb, etc., to which tourists and school students periodically visit.

## CHAPTER-5

### LAND USE PATTERN

#### GENERAL

5.1 Urban land use is one of the most essential ingredients for policy formulation relating to urban planning and development. The major objectives of existing land use studies are.

- i. To find how the existing land use compares with the space standards and to suggest reasonable standards and proportions of land requirements for different uses and to assess the land requirements for the end of the planning period.
- ii. To find the influence of the Geographical, Physical, Demographical and Socio-Economic factors on the land use pattern.
- iii. To regulate and segregate the different land uses and allow the town to grow in a planned manner.

5.2 Arcot Local Planning Area extends over 7.49 Sq.km and is situated on the Ranipet – Krishnagiri Road (N.H.46). Development has occurred at the Ranipet – Krishnagiri Road, Arcot – Cheyyar Road and Arcot – Arni which happen to be the main collector roads for movements. The main residential area is spread in between.

1. The Arcot – Cheyyar road and Arcot – Arani Roads.
2. Arcot – Arani Road and Arcot – Vellore Road and
3. Arcot – Vellore Road and Bye Pass Road.

The main development having narrow streets and paths has recorded high density in the closely built-up areas. The newly developing areas where many layouts are approved and executed to some extent are having medium densities with mixed land use.

## CHAPTER – 11

### TRAFFIC AND TRANSPORTATION

#### INTRODUCTION

- 11.1 An efficient road net work is the back bone of any economic activity in a town. Such system is capable of attracting development to a place both in economic and social aspects. A proper transportation system is essential which would clearly effect the needs of the community at the minimum cost and offering maximum utilization.

#### ROAD AND TRANSPORTATION NET WORK

- 11.2 Ranipet – Krishnagiri trunk road N.H. 41 runs North to South from Palar Bridge upto the bus stand and lakes a turn towards the West to Vellore and on to Krishnagiri. N.H. Bypass runs East to West adjacent to Palar river at the boundry of Arcot town. The road stretch from bus stand (Gandhi statue junction to Anna Statue junction is called New Vellore road. This road formerly functioned as bye-pass road to Arcot.

There are two state highway roads originating from Arcot is 1. Arcot Villupuram road and 2. Arcot – Tindivanam road. Arcot - Villupuram road originates from the Gandhi Statue junction and runs South towards Arani. The Arcot – Tindivanam road originates near the municipal market and runs east towards Cheyyar. The only other district road that passes through this town is Arcot – Kannamangalam road.

The details of Government and Municipal road is given in Table 19

**Table No. 19 Road Net Work in Arcot Town**

Sl.No.	Type	Length in Km.
<b>A.</b>	<b>Government Roads</b>	
1	National Highway (NH)	3.10
2	State Highway (SH)	2.96
3	Other District Road	0.76

3	Metalled Road	2.095
4	Earthern Road	1.875
	<b>Total</b>	<b>42.341</b>
	<b>Grand Total</b>	<b>46.161</b>

### **FUNCTION OF THE ROAD**

11.3. The municipal roads collect traffic from collector roads and joins with-arterial roads. The Bus stand and the rice mandies are located at new Vellore road and the municipal market is located at Cheyyar road.

### **BUS FACILITIES**

11.4. The main transportation system in the town at present is the buses operates by transport corporation and few private companies. The present bus stand is a "C" class type. The bus stand was constructed under IDSMT programmes during the VI th Plan period. There is no rickshaw or Taxi stand, but they are parked illegally just near the bus stand. There are 25 bus bay in the bus stand. Bus facilities are available to various places. Town bus service are available to the surrounding villages up to a distance of 35 km.

The existing facilities at the bus stand are not sufficient. The bus stand have to be up graded to cope up with present growing traffic.

## **ACCIDENTS**

11.5. Traffic congestion coupled with an indisciplined traffic, partly due to inadequate traffic enforcement have contribute to a great extent to the frequent occurrence of accidents.

## **PARKING FACILITIES**

11.6. There is no organized parking areas for tourist taxis and Auto rickshaw and other vehicles. This has resulted in under traffic congestion in bus stand area. The existing parking space for tourist taxis and Auto rickshaw at the entrance of bus stand is not properly organized. This is resulted in indiscriminate parking leading to congestion of the available road space, this creating traffic bottle necks.

## **OTHER PROBLEMS**

11.7. Road side encroachments particulars at road inter section trend to obstruct visibility. This leading to accidents the Anna Salai, New Vellore road Cheyyar and Arani roads. Bus stops are located mostly close to road in inter section leading to under to traffic congestion and delay to other road users. Service posts such as electric posts, Telephone posts, cable operator posts, Transformers are located on the carriage way at many locations lead to drastic reduction in the available road width with consequence traffic problems.

**FUNCTION AND ECONOMIC BASE**

12.1 The tertiary activities is the main functions of Arcot town. Further this town act as a service center with an influential area of Arcot and part of Walajapet taluk and predominantly serving in respect of sales of agriculture commodities, inputs and implements and other services. Thus it shall be maintaining a regional importance the eastern part of Vellore District.

**POPULATION**

12.2. The population of the Arcot town based on the past growth trends is projected for the planning period 2011 (10 years) by different methods and is given in Table 2.1.

**Table 2.1 Population Projection for the year 2011**

Sl.No.	Method	Estimated Population 2011
1	Arithmetical progression method	56,577
2	Incremental increase method	59,923
3	Geometrical progression method	56,531

12.3 The population forecasts by the Arithmetical progression method and geometrical progression method give modest figures while the incremental increase method give slightly higher figure. The population for the plan period 2011 shall be adopted as 60000 for arriving the proposals of this Master Plan. In the approved Master plan, the population of 60000 has been assumed for the planning period 2001 but the actual population is only 50,267 as per census 2001.

## OCCUPATIONAL PATTERN

12.4. As already stated in chapter 4, the percentage of workers engaged in agriculture activities are gradually decreasing when compared to other activities in this town. The percentage of workers engaged in different activities for the year 1991, 2001 and the assumption made for the year 2011 are given in the following Table No.2.2

**PERCENTAGE OF WORKERS IN DIFFERENT SECTOR 1991, 2001 AND 2011**

## REQUIREMENT OF LAND FOR VARIOUS USES:

12.3 The special distribution of land for the various urban uses have to be calculated taking in to consideration of the needs of the future population and of the past experience.

12.4 In the approved Master Plan 1993 (Base year 1984) a total 394.27 hectares has been allocated to different uses for the Planning period 2001. The details of land allocated to various uses and the existing land use as on 2001 are given in Table 2.3.

**CHANGE OF LAND USE ACCEPTED BY THE GOVERNMENT:**

12.5 After the approval Arcot Master Plan, the Government have issue certain order for change of land use. The details of land use accepted by the Government are given in Table No.2.3.

From this it may be seen that a total 9.9830 hectares of land has been converted from Agriculture use to residential use. The break up details are given below in Table No.2.4.

**Table No.2.4**

<b>Sl.No.</b>	<b>From which use</b>	<b>To which use</b>	<b>Total area</b>
1	Agriculture	Residential	9.9830
2	Agriculture	Industry	1.1730
3	Residential	Industry	0.1993
4	Residential	Commercial	0.1625
		<b>Total</b>	<b>11.5178</b>

From the above it is observed that there is more demand for residential use. The above change of land use have to be considered while formulating the proposed land use of the year 2011.

- 12.6 For assessing the spatial requirements of the land for the proposed population of 60000 in 2011 of Arcot Local Planning Area, The criteria adopted is that 85% of the urbanisable area would be for residential use including transportation and the remaining 15% for other in uncommitant uses.
- 12.7 At present the residential density of population is 135 persons/hectare. Assuming an average density of 125 persons per hectare, the urbanisable area required in Arcot Local Planning area for the Planning period 2011 shall be 480.00 hectares.
- 12.8 For allocating the for various other uses the quide lines issued by the Master Plan division of Directorate of Town and Country Planning have to be adopted with necessary modifications. Arcot town is a dormitory town only with commercial activities, and the other activities are megare. Hence, major portion of land have to be allocated for residential development. Based on the above criteria, the urbanisable land required for various categories of proposed land use for Arcot Local Planning Area is 2011 is given in the following table.

**Table 2.5 Urbanisable Land required for Arcot Local Planning Area – 2011**

Sl. No	Category of Land use	Percentage to total Developed Area		Area Required	Existing Area in Hectare	Additional Area Required
		Standard in Percentage	Allocated in percentage

	<b>Total</b>		100.00		749.29	100.00

+ Transportation has been included in Residential Area.

12.9 From the Table 2.5 it is observed that the developed land covers 49.72 % of the total area of the Local Planning Area. In the remaining undeveloped area the land under water occupy and agriculture uses occupy 19.33 and 30.95% respectively.

12.10 In undeveloped area extents to 376.69 hectares consisting of dry lands, wet lands and land under water. Keeping the most of the wet land, irrigated dry land and land under water as it is, the remaining un developed area can be taken up for future development for the plan period 2011.

12.11 Based on the above criteria and considering the existing trend of development, the proposed land use for the Planning period 2011 has been finalized. The details of land use proposed is shown in Table 2.6 and map shows the pattern of proposed land use in 2011 and its spatial distribution. In the case of sanctioned/consented detailed development plan area, the land use have been retained as per detailed development plan.

+ Residential Area includes Roads, Lands etc.

### **RESIDENTIAL AND HOUSING:**

- 12.12 The land under this use is at present in 320.96 hectares (includes roads lands and layout reservation). To accommodate the anticipated population in 2011, the land under this use has been increased to 420.79 hectares.
- 12.13 The number of house holds and houses in Arcot Local Planning Area, as per 1991 census are 7503 & 9112 respectively. The shortage of houses in 1991 works out to be 1609. The number of house hold in 2001 is 11107. Assuming a house hold size of 4.5 the projected number of house holds in 2011 is 13333. The total addition housing requirement at the end of Planning period is 5830. In addition to this 5% of house decade have to replaced. There fore the total housing shortage for 2011 will be nearly (5830 + 750) 6580. During 91 to 2000 nearly 2000 houses have been constructed and added to the existing stock. So, the housing shortage (as on details) for the end of Planning period will be in the order of 4580. Assuming the existing trend is conditioned, another 2000 houses will be added at the end of planning periodly private agencies. Most of the area developed by TNHB site and service Scheme exclude use the Municipality are still vacant. So, the availability of developed plots is met a problem. Since the

cost of land itself is very much high, the low income group and economically weaker section people can not solve in their own. So, the Government and the Housing Finance Agencies like co-operative Housing Society can chart out programme for solving housing shortage.

## **COMMERCIAL**

12.14 The commercial use which includes Bus Stand, Market, Mandies, Cinema Theatre, Kalyana Mandapam and service Industries occupies 32.89 hectare. Now allocation for commercial area has been increased to 49.1661 hectare during the plan period.

## **INDUSTRIAL**

12.15 A number of rice Mills and other service industries with less horse power are available in the Local Planning Area. The area occupied by this category is 3.81 hectares. Since vast industrial land and developed plots are available in Ranipet and SIPCOT Industrial Complex and also high cost of land, additional area proposed in this town for the planning period 2011 is only 4.8028 hectares.

## **EDUCATIONAL USE**

12.16 At present the area under this use is about 8.7086. Since most of higher order Educational Institution are located out of the town, the addition area proposed under. This is only minimum ie. 3.1781 hectare.

## **PUBLIC AND SEMI PUBLIC USE**

12.17 The existing area under this is only 6.2458 hectare. As no. of Government offices are location in Ranipet, the need for additional area is minimum. Hence, 11.8379 hectare has been proposed under this category.

## **AGRICULTURE USE**

12.18 An extent of hectares is reserved under Agriculture use zone. This area includes wet lands, dry lands, compost yard, burial grounds etc., It also includes the notified parks and play fields and the layout reserved sites which were under the possession of local body.

## **WATER SUPPLY**

12.19 One of the basic requirement for any settlement to grow is the availability water in sufficient quantity. At present, the per capita water supply is 90 lpcd which is normal when compared to other towns. The present water supply can meet the demand of the future population also in the plan period 2011. So, water supply distribution system work have to be taken up in a phased manner for the newly developing areas.

## **SEWAGE, DRAINAGE AND SOLID WATER DISPOSAL**

12.20 The side drains have to be constructed for the uncovered and newly developing areas. The possibility of providing under ground drainage facility is remote in the near future. So, L.C.S. programme can be taken up to covered houses and in future the house owners have to instructed to provide their own W.C. while approving the building plan. The storm water system may be improved by silt removing.

## **TRAFFIC AND TRANSPORTATION**

**12.21** The important roads in the local planning area are NH, Bypass Road, Vellore Road, Arani Road and Cheyyar Road. In these roads the traffic intensity are high and number of accidents are taking place. The Pallavan consultancy Limited, Chennai has prepared a Traffic operation and management plan for Arcot town. The suggestion made by the consultant have to implemented on a priority basis. The National High Way Authority has taken up a four lane project on NH Bypass and it is under execution. The existing bus stand is 'C' class type. This has to be upgraded to 'B' class. Bus stand with all infrastructure facilities.

PART - III

**PART III**  
**CHAPTER – 13**

**PROJECTS AND IMPLEMENTATION**

13.1 The following projects have been identified for the Plan period 2011. These projects have to be implemented in a phased manner. This is only an indication, detailed design and financial aspects have to be worked out at the time of finalisation of projects.

**RESIDENTIAL DEVELOPMENT:**

13.2 Arcot is only a primary town. 85% of the area have been proposed for residential development. Major area has been covered under detailed development plan. They are in various stages. These have to be implemented in a phased manner according to the demand. The area developed by the TNHP and the municipality are still vacant. The time limit condition imposed by these agencies while allotting the plot for construction of houses have to be implemented strictly in order to solve the housing shortage in this town.

**SLUMS**

13.3 There are 12 slums in the town. Some of the slums have already been covered under slum improvement programme. The remaining slums can be taken up for improvement under the same programme.

## COMMERCIAL DEVELOPMENT

13.4 The following commercial project identified by the Arcot Municipality under perspective plan for Development of Town in Vellore District may be taken up for implementation in a phased manner at the appropriate time.

1. Construction of Seven shops in the first floor at Municipal Bus stand.
2. Construction of Thirteen shops in the first floor of A.G.R. Building
3. Construction eight shops in Ground floor and construction of 34 shops in the first floor at Mango Mundy.
4. Construction of Mini Super Market at T.B. Site.
5. Reconstruction of Daily Vegetable Market with first floor.  
Ground Floor - 100 shops  
First Floor - 100 shops
6. Construction of Fish & Mutton Market
7. Construction of Shopping complex at S.1. division office in Arani Road
8. Construction of shopping complex with Ground and two floors at Bus stand Petrol Bunk site.

## TRANSPORT:

13.5.1 The following projects identified by the consultant under Traffic operation and management plan for Arcot have to be implemented in a phased manner.

### 13.5.2 TRAFFIC MANAGEMENT MEASURES

5.2.1.1 Advance warning signs, direction signs and pedestrian crossing signs need to be installed at important locations in Arcot town to help and control the movement of vehicles and pedestrians.

### **5.2.1.2 Shifting of Bus Stops**

The bus stops on New Vellore Road near Anna Statue and near bypass road have to be shifted. New Bus stops may be marked on the road with necessary bus stop signs at predominant bus stop location.

Pedestrian crossings should be marked at the designated places where pedestrian crossing activity is observed to be high. This will improve the road safety considerably. It is recommended to mark pedestrian crossing at the following places.

1. On all legs of the intersection in front of bus stand.
2. On New Vellore road near Anna Statue.

The pedestrian crossing will have a width of 3.0 metres. Individual strips may be 50 cm thick. A gap of 50 cms should be provided between strips.

### **5.2.1.3 Parking of Vehicles**

#### **(i) Near bus stand**

It is observed the vehicles are parked haphazardly on both sides of New Vellore road. It is proposed to utilize the open space in front of the Municipal park for parking of autorickshaws and taxis. Two wheelers may be parked near the existing taxi stand.

#### **(ii) Near Bypass road**

It is observed that heavy vehicles, trucks and medium commercial vehicles such as tempos are parked at this location. As the carriageway at this point is very narrow, it is suggested that the open space adjacent to Anna Road in front of Ramakrishna School approach may be leveled and used for parking of commercial vehicles.

### 13.5.3 Traffic Engineering Measures

#### 5.3.1 Intersection Improvements

(i) Intersection of Ranipet-Krishnagiri Road, Visharam bypass road, Anna Road and Kalavai road.

- \* Anna Road and Kalavai road are proposed to be widened to provide 10 metres and 7 metres wide carriageway respectively.
