RESIDENTIAL

3.06 This town consist of 81.027 hectares which works out to 31.157 % and 11.80% to the developed and total arease respectively. The old town which otherwise known as core town is now highly congested with multiple activities and different modes of transport. At North East direction near arts college a newly developed residential area namely Ghanagiri Nagar is characterised by a regular street pattern and well shaped plots.

COMMERCIAL

3.07 Sivakasi Town experiences lack of organised Commercial area except Municipal market. The total commercial area is 23.03 hectares which works out to 8.93 percent and 3.39 percent to the developed and total areas respectively. The Commercial developments has taken place on both sides of the following streets.

1. South Car Street
2. Rajarethinam Street
3. R.S.N. Road
4. East Car Street
5. Certain stretch of Madurai Road

The local commercial area are scattered here and there catering to the needs of the local people. The primary residential area i.e, Ghanagiri Nagar, has inadequate commercial area and the area available presently is mostly lacking in commercial development, which is only 0.5 hectare per 1000 persons.

INDUSTRIAL

3.08 The area under Industrial use is 38.038 hectares which constitute about 14.7 percent and 5.58 percent to the developed area and total area respectively. This composition seems to be slightly higher than the towns which are to be compared. Litho press, Offset Printing, Fireworks, Match works and some rice mill are the major industries in Sivakasi. The Sivakasi Town is classified as Industrial Town.

### SIVAKASI LOCAL PLANNING AREA

Sivakasi railway station is an important station in the Southern railway due to movement of Industrial products. This station is located on the Madurai-Shenkottai metre guage line.

The nearest Air port, located at Madurai is about 76 K.M. from the Sivakasi Town.

WATER SUPPLY

3.14 Sivakasi Town is served with the protected water supply by intermittent system. The duration of water supply is from 06.00 Hrs. to 07.00 Hrs. The percapita supply in summer is 21.42 lpd and during winter it is 102.69 lpd.

Water is collected from Vembakkottai and pumped to elevated reservoir and supplied by gravity system. Water is also supplied by truck to these parts where water supply system is not available. The water is listributed through 112 public fountains and 3181 house service connections.

ELECTRICITY

3.15 The Electricity required for the Town is supplied by Tamil Nadu Electricity Board. There are 1299 street lights are available. Consumption of electricity are as follows.

### SIVAKASI LOCAL PLANNING AREA

CHAPTER IV.

LAND USE AND TRANSPORTATION

4.01 Sivakasi Town has developed in a circular pattern. Madurai Road, Srivilliputtur Road, Sattur Road and Vembakko-ttai Road are the major roads radiating from the nucleus of the Town. Among above roads, Sattur road is the State Highways.

4.02 Table 4.1 gives the land use of this town. From the existing land use breakup it is seen that out of the total area of 688 hectares, The total developed area is 260,9555 hectares which forms 37.91 percent to the total area and the undeveloped area is 427.6912 hectares which forms 62.09 percent to the total area. The existing land use structure of the local planning area is given in the table indicated below.

Table No.4.1

SCOPE OF URBANISATION

ANALYSIS AND ASSESSMENT

5.01 The existing trend of the Town with reference to its growth potentials, land utilisation and functions were dealt in the forgoing chapters. An attempt is made in this chapter, to analyse the potentialities, needs and limitations within which the Town can be developed in a more organised manner.

5.02 The planning period for this Master Plan is taken as 20 years from 1981, the last census as the base year. As such forecasts and projections are made for the requirements in 2001.

5.03 The population of the town has been increasing steadily in the past decades. The expected population in Sivakasi Town will be 84,000 in the year 1991, 1.17 lakhs in the year 2001 (Source: R.P.Division, Director of Town and Country Planning). If this estimated figure is adopted for planning proposals, there will be need for allocation of resources for the additional population about 24,173 and 57,173 in the year 1991 and 2001 respectively.

5.04 Presently Sivakasi has developed as a Industrial Town mainly due to the availability of cheaper work force.

The proposed economic activities can be organised to cater to the needs of growing population of planning area. The land needed to be accommodate the economic activities is discussed in the next chapters.

5.05 Presuming that there will not be any changes in the percentages of population in different age groups of 1971 census for another two decades, 'Projections are made as given in table 5.1

Table No.5.1

Nearly 66,000 people fall between the age group of 15 and 59 which constitute the anticipated working force of town 2001.

CHAPTER VI.  
MASTER PLAN PROPOSALS.

6.01 The planning objectives of the Master Plan area based on the following assumptions are,

(i) Sivakasi Town will retain its multi functional character namely Industrial, Commercial and Administrative activities.

(ii) Sivakasi Town and the environs are influenced by industrial activities namely Litho press, off set printing Fire works and Match works. The present trend is expected to continue in the future decades also.

With these basis, the sectoral objectives are discussed in the following paragraphs,

LAND DEVELOPMENT.

6.02 Land is a scarce commodity particularly in urban areas where different uses will be competing. Based on the land now put to urban use, a rough estimate is made in this chapter to assess the future requirement as land for the population anticipated for the period 1981-2001.

6.03 The present population (1981 census) of the Town is 59,827 and the estimated population for Sivakasi Town in the years 1991 and 2001 will be 84,000 and 1,17,000 respectively. The present over all density of population in the town area during 1981 census was 86-87 persons per hectare. There are vacant lands to a considerable extent within the town, of which some are in agriculture use. However for future planning of the town an over all density of 170 persons per hectare is assumed to be a desirable standard. Based on this assumption, the over all land requirement for the future decades has been worked out and shown in the table 6.1

Table 6.1

LAND REQUIREMENT FOR ESTIMATED OPOPULATION OF  
SIVAKASI TOWN FOR THE YEAR 1991-2001

Decade	Existing in hectares	Requirement of land in hectares	Total are to be added in hectares.
1981-1991	260.96	425	164.04
1991-2001	425	545	120.00
Total Requirement.			284.04

From the above table, it is necessary that an additional area of 164.04 hectare is needed for the estimated population for the year 1991 and an area of 120.00 hectares for the year 2001. This would mean, upto the planning period (upto 2001) the existing land area under Municipal limit has to be necessarily brought under planned area as as to achieve optimum use of land. The lands available under non-urban use and vacant land is to be utilised for urban development.

COMMUNITY ACTIVITIES:

6.04 The objective of the preparation and implementation of the Master Plan for a Town is to create an environment for community participation. The plan aims at the overall welfare of the Community to whom it is intended and is to be achieved over a period of time. The community participation is considered absolutely essential in the following.

- (1) Identification of problems.
- (2) formulating solutions.

(...22...)

(3) implementing the projects.

and

(4) in sharing the expenditure required for execution of the projects.

In order to achieve the objectives of this plan, and to promote the Community's participation in fulfilling the tasks assigned by the plan, the members of the community will have to be motivated to actively participate in executing the projects. The residential, commercial and industrial activities shall be planned to attract the private investment which will ultimately lead to reduce the burden of the planning authority.

#### ACTIVITY ZONES

6.05 The study of the profile of the town reveals that the town is situated in a favourable location for Trade and Industrial activities, Mostly the retail trade units had spread along the Traffic corridors. There are industries of quite a considerable number located in a disorganised manner in the town. The plan objective is to orient towards organising an orderly developments of trade and industrial units so as to cater to the needs of the town.

#### STANDARD OF URBANISATION .

6.06 The existing facility for social gathering includes Cinema Theatres, reading rooms and few parks with no organised space for community activity. The plan objective is therefore to be in line with the provision of the services to the extent of the desired norms and standards both for the present and for the future population. The plan objective is to create an organised place for community activity.

6.07 The present supply of water is at the rate of 102.69 litres / day / head and 21.62 litres / day / head during winter and summer respectively as against the standard requirement of 250 lit. / day. / head. This has to be improved to ensure a supply atleast 150 Litres/day/ head throughout the year.

6.08 There is no underground drainage for the town, and as a result, the waste water is allowed to run over the open land and surrounding areas, which is a healthy hazard. It is therefore necessary for a comprehensive improvement scheme urgently.

6.09 Housing stock has to be improved by pooling the public fund by the State Housing Board. The public participants in housing activity has to be stimulated and streamlined by the preparation and implementation of Detailed Development Plans by Sivakasi Local Planning Authority. Due to much of industrial development in this town, the industrial organisations also may be called for to form Housing Societies on cooperative basis for their labourers.

6.10 The plan objective is to lay emphasis on co-ordination of participation of various agencies in taking the sectoral problems. The Local planning authority constituted for this town will be responsible to co-ordinate and monitor the developmental agencies to achieve the target assigned through this Master Plan.

RESIDENTIAL

6.11 With the intention to develop this town, as an industrial town, major pockets of land within the town were notified as industrial area as early as during 1947, but due to subsequent Government order in respect of location of match industries beyond 5 K.Ms. of the Municipal limits, has resulted in either the lands notified as industrial area are kept vacant or put into residential use. The already notified residential areas have become saturated, necessitating development of other lands reserved for other uses, and has therefore now warranted provision of additional lands under residential use. Taking into account of the above, certain pockets of lands falling under notified industrial area and which are vacant over all these years are now being proposed to be developed under residential use. Considering the present trend of developments, due care has also been given in proposing the residential area as primary and mixed residential uses with proper buffer zone adjoining the other uses. The total extent of land thus proposed under this zone is 300 hectares.

COMMERCIAL

6.12 These are proposed mostly along the major thoroughfares, to a depth of 30 metre on both sides, considering the existing commercial activity in these areas and also taking into account of the existing godowns which are fairly large in size, and to accommodate expansion of

this activity, the lands adjoining the above are proposed as commercial use zone. In addition, small pockets of land within the residential and industrial use, are also brought under commercial use zone, considering the existing developments and also their need to serve the local residents within a short distance. The total extent of land brought under this use is 91 hectares.

#### INDUSTRIAL

6.13 Although some of the lands coming under the notified industrial area are brought under residential use due to certain reasons mentioned already, additional pockets of land in other areas of the town are now proposed as industrial use. This has become necessary, in order to cope up with the industrial activity in the above said other areas. The total land proposed under this use zone is 82 hectares.

#### EDUCATIONAL

6.14 The lands mostly adjoining the existing educational institutions are reserved for educational use to cater for further expansion of these institutions. The area reserved under this use is 27 hectares.

#### PUBLIC & SEMI PUBLIC

6.15 Certain additional areas are proposed within the town so as to serve this use need, in different location and also due care has been given and additional lands is reserved for the expansion of the bus stand. The existing land under public institutions use are retained as such. The total area under this use is 128 hectares.

AGRICULTURE

6.16 The existing vacant lands (including small areas) intended for agricultural use is kept without cultivation due to acute scarcity of water which has therefore necessitated proposals for different other uses.

TRANSPORT

6.17 The major transportation carriers are sufficiently wide enough except for in the town centre, where it is impossible to suggest widening proposals. Taking into account of the developments in the near future, two new roads vide A-A and B-B with 12m. width have been proposed in between Velayutham Road and the Railway track, which would serve the area between Velayutham Road and the Railway track.

## CHAPTER VII.

### ZONING REGULATIONS

7.01 For the implementation of the plan by the Local Authority zoning regulations are absolutely essential as contemplated in this master plan. The already approved zoning regulations by the Government G.O.Ms.No.1730, Rural Development and Local Administration Department, dated 24th July 1979 given in Appendix-A, and enclosed in this report shall apply for this Town. The grant or refusal of planning permission shall be as per the above zoning regulations.

7.02 In the case of an area comprised with in a detailed development plan approved under the provision of Town And Country planning Act 1971 and in respect of areas comprised under detailed Town planning Schemes sanctioned under Town planning Act 1920, the development in those areas shall be in conformity with the detailed Development plan thus approved or sanctioned and regulated as per the provisions contained in the respective Detailed development plans.

Government of Tamil Nadu

Abstract

TOWN PLANNING-preparation of zonal plans-formulation of draft regulations submitted by the Director of Town and Country Planning-approved.

Rural Development and Local Administration Department

G.O.Ms.No.1730

Dated the 24th July 1974.

read:

1. F.O. Lr. No. 28332/MD/73-1 RD&LA dt. 7.3.73.
2. From the Director of Town and Country Planning Lr. No. 10989/73 SM, dt. 21.3.74.
3. From the Member Secretary, Madras Metropolitan Development Authority, D.O.Lr.No.1983/74-ADP, dt. 19.5.74.

ORDER:

The Director of Town and Country Planning submitted draft Zoning regulations on use of land and buildings particulars in urban areas. These regulations list out the uses permissible in each of the use zones and the restrictions to be imposed. For the purpose of these regulations, it has been suggested that the urban areas may be divided into the following six major use zones:-

1. Residential use zone
2. Commercial use zone
3. Industrial use zone
4. Educational use zone
5. public and semi-public use zone
6. Agricultural use zone

of these, the residential use zone has been further sub-divided into two categories namely:-

1. Primary residential use zone; and
2. Mixed residential use zone

The industrial use zone has been similarly sub-divided into three categories namely:-

1. Controlled industrial use zones
2. General industrial use zone; and
3. Special industrial and hazardous use zone

The Director has also stated that the Tamil Nadu Town and Country Planning act 1971, provides for the zoning of areas under sections 17(1) and 20(2) (g) through the Master plans and detailed development plans respectively. He has recommended that the draft zoning regulations may be approved and communicated to the local planning authorities for adoption as part of the Master Plan for proper land use planning and control in addition to other regulatory measures and that as for the Madras Metropolitan area, a copy of the regulations may be sent to the Member Secretary, Madras Metropolitan Development Authority for adoption as part of the Metropolitan Development plan with such modification as may be necessary, in consultation with him (the Director) and the Government.

3. A copy of the draft regulations was sent to the Member Secretary, Madras Metropolitan Development Authority for his views. He has stated that the comprehensived land use proposals and zoning regulations for Madras Metropolitan area and under preparation and that the suggestion of the Town Planning Directorate will be considered and incorporate to the extent as may be necessary in the final proposals.

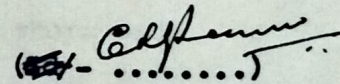

4. The Government have examined the suggestion. They accept the views of the Member Secretary, Madras Metropolitan Development Authority so far as it relates to the Madras Metropolitan Area and as for other Urban areas of the State, the Government approve, in principle, the draft zoning regulation submitted by the Director of Town and Country Planning. The Director is requested to furnish copies of the draft zoning regulations to the local planning authorities as soon as they are constituted.

5. The receipt of this order may be acknowledge by the director of Town and Country Planning.

(By order of the Governor)

M.M. RAJENDRAN,  
Secretary to Government.
