KANCHEEPURAM MASTER PLAN

CHAPTER I

INTRODUCTION

PHYSICAL FEATURES

LOCATION

1.01 Kancheepuram town is located in the South West direction at a distance of 76km from Chennai. It is situated at $12^{\circ} 50'$ North Latitude and $79^{\circ} - 42'$ east longitude. The town has an average elevation of 275' (83-82m) M.S.L. The main land lies on the northern bank of the holy river Vegavathi, a tributary of the river Pallar.

TRANSPORTATION LINKAGES

1.02 The town is well connected by rail and road with the adjoining urban centers, viz Arakkonam, Chengalpattu, Arcot and Vandavasi. The Chengalpattu Arakkonam broad gauge railway line passes through this town (work is under progress). Apart from this the great western trunk road from the Chennai to Bangalore also passes through the Local Planning Area. Vegavathi river traverses from west to east in the Planning area and it also divides the Planning area into two parts.

CLIMATIC CONDITIONS

1.03 The temperature throughout the year i. high, reaching a maximum of 37.50° C average in the month of April to July and recording of minimum average of 20.5° C temperature during the months of December to February. The prevailing wind direction is South West in the morning and south east in the evening. The town gets rains from both South West and North East monsoon. Average annual rainfall of the Local Planning Area is 40" or 1125 m.m.

Soil

1.04 Predominant soil found in the area are Black, Redloom, Clay and Sand. The town has natural slope from West to East with a fall of 42ft.

HERITAGE BACK GROUND

1.05 Kancheepuram is very ancient city dotted with large number of temples. The city is considered as one of the foremost 'shakti peetas' of tantric works in India.

The city was ruled by different dynasties, From the records available the city was ruled in 100 B.C by Thondaiman Ilanthirayan. During 985-1016 A.D by Rajaraja Chola, around 1522 A.D by Krishna Devaraya and since 1865 A.D it came under colonial rule.

In the following period among the rulers of Pallava dynasty, Narasimha Varman II, Rjasimha Varman and Nandi Varma's contribution to the city were significant. Karikalan constructed the mandapam to Ekambaram, later Bappa built his palace on the north of Vegavathi on a mound overlooking Ekambaranthar temple. Rajaveedhi came into being linking the temple and palace flanked by settlement of Arachakas, Kshatriya settled around the palace.

After Narasimha Varman I (630-660AD), Narasimha Varman II improved the building activities and built Kailasanthar and Iravatheswar temple. He provided the Manjaneer channel to facilitate drainage and built the sarvathirtha kulam for public bath near the Ekambaranthar temple. The town was surrounded by a fort and moat in the form of a lotus flower. He also widened the roads and streets and planted trees on both the sides of the roads. The city was developed on the Nanthivarthar pattern with 2 or 4 groups of settlements with a temple or the palace as nucleus, linked with straight roads cutting at right angles, it was thus on a cross pattern with palace or temples as vista closing and terminal points at the ends of the Rajaveedhi on north and south and Kailasanathar and Vaikunda Perumal temple at the eastern and western ends respectively.

It is believed that during pallava period the silk weaving industry might have started with strong footing. Nandivarman Pallava (731-798 A.D) ruled for 45 years and he built Vaikunda Perumal temple and Mukteswarar Temple.

Houses came up on raised grounds and with burnt bricks for the first time, and the concept of garden at the backyard, a wide front space in the form of 'Thinnai' or Verandah which is the scene in old parts of the city even today. This was to provide good ventilation and for draining of rain water swiftly. Kamatchi Amman temple was constructed by Nandivarma pallava (731-790 AD)

During Rajendra Chola's time (910-1279 AD), the town was widened far and wide towards east, renovating Varadaraja perumal temple and Yædhothkari perumal temple and continued construction of the temples left incomplete by the pallavas. New settlements came up around Varadaraja perumal temple, which is connected by a wide road with the palace. The market centre was shifted towards east because of the new temple Katchapeswara.

During Vijayanagar Kings (1326-1645 AD) their viceroy ruled Kanchi is the place of kings. During the rule of Krishnadevaraya in 1522 AD, the 100 pillared mandapam in varadaraja perumal temple and the main gopurams of Ekambaranathar temple were built by Krishnadevaraja. The town during his time had 25,000 population spread over 4 sq miles area. While the Mugulas ruled Kanchi Arcot Nawab built Jumma Mujid and Hazarat Auliya Durga between 1696-1720 and, two other mosques were also built during this period. The British built in 1922 the church of south India, and in 1943 St. mary's church which are the monuments of British regime in Kanchi.

The Sankaracharyas Bhagvadpada swept like a tornado through the length and breadth of Bharat varsha, propagating the message of Advaita and Manava Dharma. Finally he settled down at Kanchi, founded the Kamakoti peeda in 482 BC over which, he himself presided established his intellectual supremacy by being enthroned on the sarvagna peeda and attained videha mukthi at Kanchi, in his thirty second year, by merging himself in the presence of Kamakshi.

One of the famous succeeding acharyas was sri Chandra Sekharendra Saraswathi Swamigal who lived for one hundred years. In his name only a deemed university was started in the year 1995.

It has 12 facilities like B.Sc, B.Com, B.E., at the same time also awards PG degree in the fields of

- 1) Adi Sankara and Advaita
- 2) Adi Sankara and Karma theory
- 3) Agamic and Tantric studies
- 4) Management
- 5) Computer Science.

The town is getting its importance now a days because of this University. It attracts a lot of students not only from local but also from other states of India.

Though it has a little effect on the development of kancheepuram town it attracts new opening of town bus routes connecting kancheepuram town and Enathur near by Chennai - Bangalore road educated public and students avail library facility of this university. The library contains not only old books on Vedas and Sastras but also contains many palm leaves on a wide range of subjects like vedantra Nyaya Astrology, Mantras and Tantras

PEOPLE

GROWTH OF POPULATION

1.06 Kancheepuram Town had a population of 1,10,657 in the year 1971 1,31,013 in the year 1981 and 1,44,955 in the year 1991 as per census. The population of the town has shown an increase of 31% over the decade 1971-1991. The growth of population of Kancheepuram town and decennial variation since the year 1901 are given in the table 1-1.

Table :1.1
Population of Kancheepuram Town

Year	Population	Variation %
1901	46,164	--
1911	53,864	16.68
1921	61,376	13.95
1931	65,258	6.32
1941	74,685	14.37
1951	84,810	13.65
1961	92,714	9.32
1971	1,10,657	20.53
1981	1,31,013	18.40
1991	1,44,955	10.64

(Source : Census of India 1991)

Since 1951 the population of the town has gradually increased. The abnormal increase in the year 1991 is due to spurt in the commercial activity.

POPULATION DENSITY

1.07 The population density of the Local Planing Area is 17 Persons/Hec. and for the town is 114 Person/Hec. as per 1991 census. The maximum residential density occurs in bazaar area and surrounding the temples. The minimum residential density occurs in the rural area.

SEX RATIO:

1.08 The Sex ratio of the population of Kancheepuram town is given in the table

Table 1.2
Sex Ratio of Kancheepuram Town

Year	Male	Female	Female/1000 Males
1901	22,533	23,631	1048
1911	26,451	27,413	1037

1981	80,048	78,332	978
1991	91,046	90,708	996

(Source: Census of India 1991.)

1.09 The higher number of females in the early decades reflects the rural character of the town. Due to the establishment of cottage Industries, Production of silk sarees has brought about the shift from primary to non-primary activities which ultimately has resulted in the influx of male population and there by showing a decline in female population.

LITERACY

1.10 As per 1991 census 72% of the total population of Kancheepuram town were literates of which males accounted for 60.5% and females 39.5%. There has been a steady increase in the percentages of literates in the town from 56.6% in 1971 to 72% in 1991.

DEVELOPED AREA

Residential use.

MUNICIPAL AREA

1.12 The residential area of the town is 416.04 Hectares which constitute about 43.96% of the total area of the town mostly concentrated around the temples. The town possesses about 100 temples both big and small which are scattered around the town. In the area near the Ekambareeswarar temple and the Kamatchi Amman temple the predominant land use is mixed residential. The residential development on the northern side is limited by the municipal boundary and also by the railway line which passes through Northern part of the town. In the Southern side of the town the residential development is parallel to the Vagavathi river. The residential area developed in the South Eastern direction in the area surrounding the Varadharaja Perumal temple. The other predominant residential area are near Singaperumal koil and near Krishnarayan street in the South.

NON-MUNICIPAL AREA

1.13 The residential area in the non-municipal area is 981.05 Hectares (or of villages). This accounts 70.83% of the Total Local Planning Area.

TOTAL PLANNING AREA

1.14 Total residential area of the Local Planning Area is 1397.09 Hectares which is 16.73% of the total Local Planning Area.

COMMERCIAL USE

1.15 The commercial area of the town occupies 62.03 Hectares ie 6.58% of the town area. The important commercial area of the town are mainly concentrated around Sangusapet, Ennaikara street, Kavara Street, Nadu Street, Gandhi Road, Mettu Street, Sengaluneer odai street, Raja street, Salai street, Kamarajar road and almost continuously along the Gandhi road from the junction of the Kamarajar road. Along the railway station feeder road commencing from the junction of Gandhi Road, there is a tendency of continuous commercial development. Commercial area seem to have developed with the temple as nucleus and nearby the Sengaluneer Odai street and Raja street because of the Kamatchi Amman temple. The commercial development in Kamaraj street is purely due to the location of the bus stand. The commercial development of the Gandhi Road is because it forms a part of major thorough fare, connecting Chengalpattu and Arakonam. There are 5 markets in existence including one private and one exclusively for flowers and garlands.

Total commercial area of the Local Planning area is 74.71 Hectares which works out to 0.84%

TRANSPORTATION AND COMMUNICATION:

MUNICIPAL AREA:

1.21 The area covers under this usage in the town is 89.06 Hectares and 9.41% of the town area. The main use under this head are roads, streets, bus stand, lanes, railway station, truck terminals and bus depot etc., The meter gauge railway line running on the northern boundary of the town is being converted into broad gauge line and the Kancheepuram Railway station is situated on the north eastern side of the town. The new Railway station is also proposed in the North Western boundary of the Town. (i.e., near Ponneri Eri). This railway line connects Chengalpattu and Arakkonam via Kancheepuram. The railway station of Kancheepuram and Nathapettai lie in the Planning area limit.

The bus stand is situated in Maduranthottam locality of the town. Provision has been made for accommodating 50 bus bays.

1.22 Kancheepuram town is well connected by bus routes from Chennai and major towns in adjoining districts, as high as 403 buses with about 2 ½ lakhs commuters are operated in 191 routes having origin /destination or passing point in Kancheepuram. However it is essential that more number of buses to Chennai may be operated. Seventy buses in 54 routes are operated as town services covering the kancheepuram town area and adjoining villages.

1.23 As far as railway line is concerned the metre guage railway line connecting and Chengulpet and Arakkonam Vai Kancheepuram is being converted into broad guage line. The new conversion broad guage line is accessible from Kashmir to Kanniyakumari. It attracts tourists from domestic and international areas. This could facilitate exports of rice and handloom cloths from this town silk sarees are not transported by the train but by vans because of security and need of insurance

The type and the length of the roads maintained by the municipality are given below:

<u>Type of road</u>	<u>Length of Road in K.M</u>
Concret Road	1.09
B.P.T surface road	55.80
Metalled Road	18.69
Non-Metalled Road	0.28

Total	75.86

UNDEVELOPED AREA:

MUNICIPAL AREA:

1.24 The area under this use constitutes the major portion of the town constituting about 26.37% of the town area.

NON-MUNICIPAL AREA:

1.25 Under this usage 7402.88 Hectares of land is available with in the Planning Area. A major portion of this area ie., 4255.85 Hectares is used as valuable agricultural lands.

ECONOMIC BASE:

1.26 Kancheepuram is one of the most sacred towns of India having a number of ancient temples which attract tourists. The place is also famous for handloom silk sarees. The main economic base of the Local Planning Area is depends on Trade, Commerce and Tourism and to certain extent agriculture.

INDUSTRIES:

1.27 The Kancheepuram Local Planning Area is one of the most important manufacturing centers in India for handloom goods, particularly silk sarees. The Kancheepuram silk saree is well known through out the world for its texture and workmanship. Apart from this metal working handicrafts in small scale is also existing. Tourism is also to be treated as one of the main industries in the town.

COMMERCE:

1.28 Kancheepuram is one of the major important commercial center of this district. Handloom particularly silk sarees are the main product. The major commercial activity including silk sales takes place at Sengaluneer Odai street, Raja street, Salai street, Kamaraj street, Gandhi road Mettu street, Bava pettai and Railway station Feeder road.

State Khadi and village industries board has one product centre at kancheepuram, State khadi and village industries board has got 75 looms in operation in the surrounding villages and produces silk sarees worth of rupees over 10 lakhs per year.

Tamilnadu sarvodaya sangh have got six silk production centres in the town Tamilnadu sarvodaya has 150 looms in operation in the surrounding villages and produce silk sarees worth of rupees over one crore per year. In addition there are various other 23 silk co-operative societies with 30,882 looms and 2 power looms units the value of production through these societies is 7.25 lakhs per month.

There are three daily markets maintained by the Kancheepuram Municipality. There is also one private daily market. In all these markets groceries and vegetables are marketed. More over there is a daily flower market where garlands, flowers, sandals, aste, rose water, agarbathis etc., are sold.

URBANISATION

LEVEL OF URBANISATION:

1.29 Kancheepuram Municipality which is a selection grade Municipality all under class I town as per 1991 census. This town has a population of 144955 covers 1.55% of the population total Planning Area.

The Sevilimedu is a selection grade town panchayat and it has 13433 population as per 1991 census.

UTILITIES AND SERVICES:

1.30. The provision of utilities and service and extensions indicate urbanisation trend.

HOUSING:

1.31. The following table shows the number of houses and household in the town and rural Area as per 1991 census.

Table 1.5

	TOWN 1991	RURAL AREA 1991	TOTAL LP AREA 1991
House	18,440	8,306	26,746
House hold	25,680	8,796	34,476
Shortage of house	7,240	490	7,730

As per the 1991 census there was a shortage of 7730 houses in the Local Planning Area.

Most of the houses are semi-pucca construction and remaining are pucca and kutcha construction.

Details Of Development Plans:

1.32. The following Detail of Detailed Development Plans are in force. Sanctioned detailed development plans

1. Bus Stand Area Town Planning Scheme
2. Sevilimedu Detailed Development Plan No.3
3. Vishnukanchi Detailed Development Plan No.1

Consented Detailed Development Plans:

3. Vishnukanchi Detailed Development Plan No.3 C

4. Arappanacheri Detailed Development Plan No.2 C
5. Arappanacheri Detailed Development Plan No.4
6. Karapettai Detailed Development Plan No.1
7. Karapettai Detailed Development Plan No.2 C
8. Karapettai Detailed Development Plan No.3

The provision contained in detailed development plan shall be followed along with master plan provisions while enforcement. In all the above schemes many internal roads are suggested for future needs. Steps may be taken to implement all these proposed roads for the benefit of inhabitants.

INDUSTRIES:

1.33 The major industries in the town are influenced by the handloom, cotton, weaving, spinning, dyeing, dry cleaning and metal working. Some service engineering works, automobile and mechanical workshops, rice mills and printing presses are also available in the town. One roller flower mill and a small Industrial Estate are located in the vicinity Area.

WATER SUPPLY:

1.34 Protected water supply to this town was established near vegavathi river and palar river. The water is collected from the infiltration gallery and is supplied to the town through a 16" dia pipe. The scheme was designed for an ultimate population of 56,000 at the rate of 75 litres per head per day. Another water source in palar river was constructed in 1961. Now the same scheme is improved to suit the present need. The average water pumping is 160 lakhs litres per day.

There are seven water supply zones in the city each supplied by a OHT. There is one ground level reservoir near Ekambaranathar temple. The total capacity of the OHTs as of 1998 was 9.82 million litres serving a total population of 1.37 lakhs.

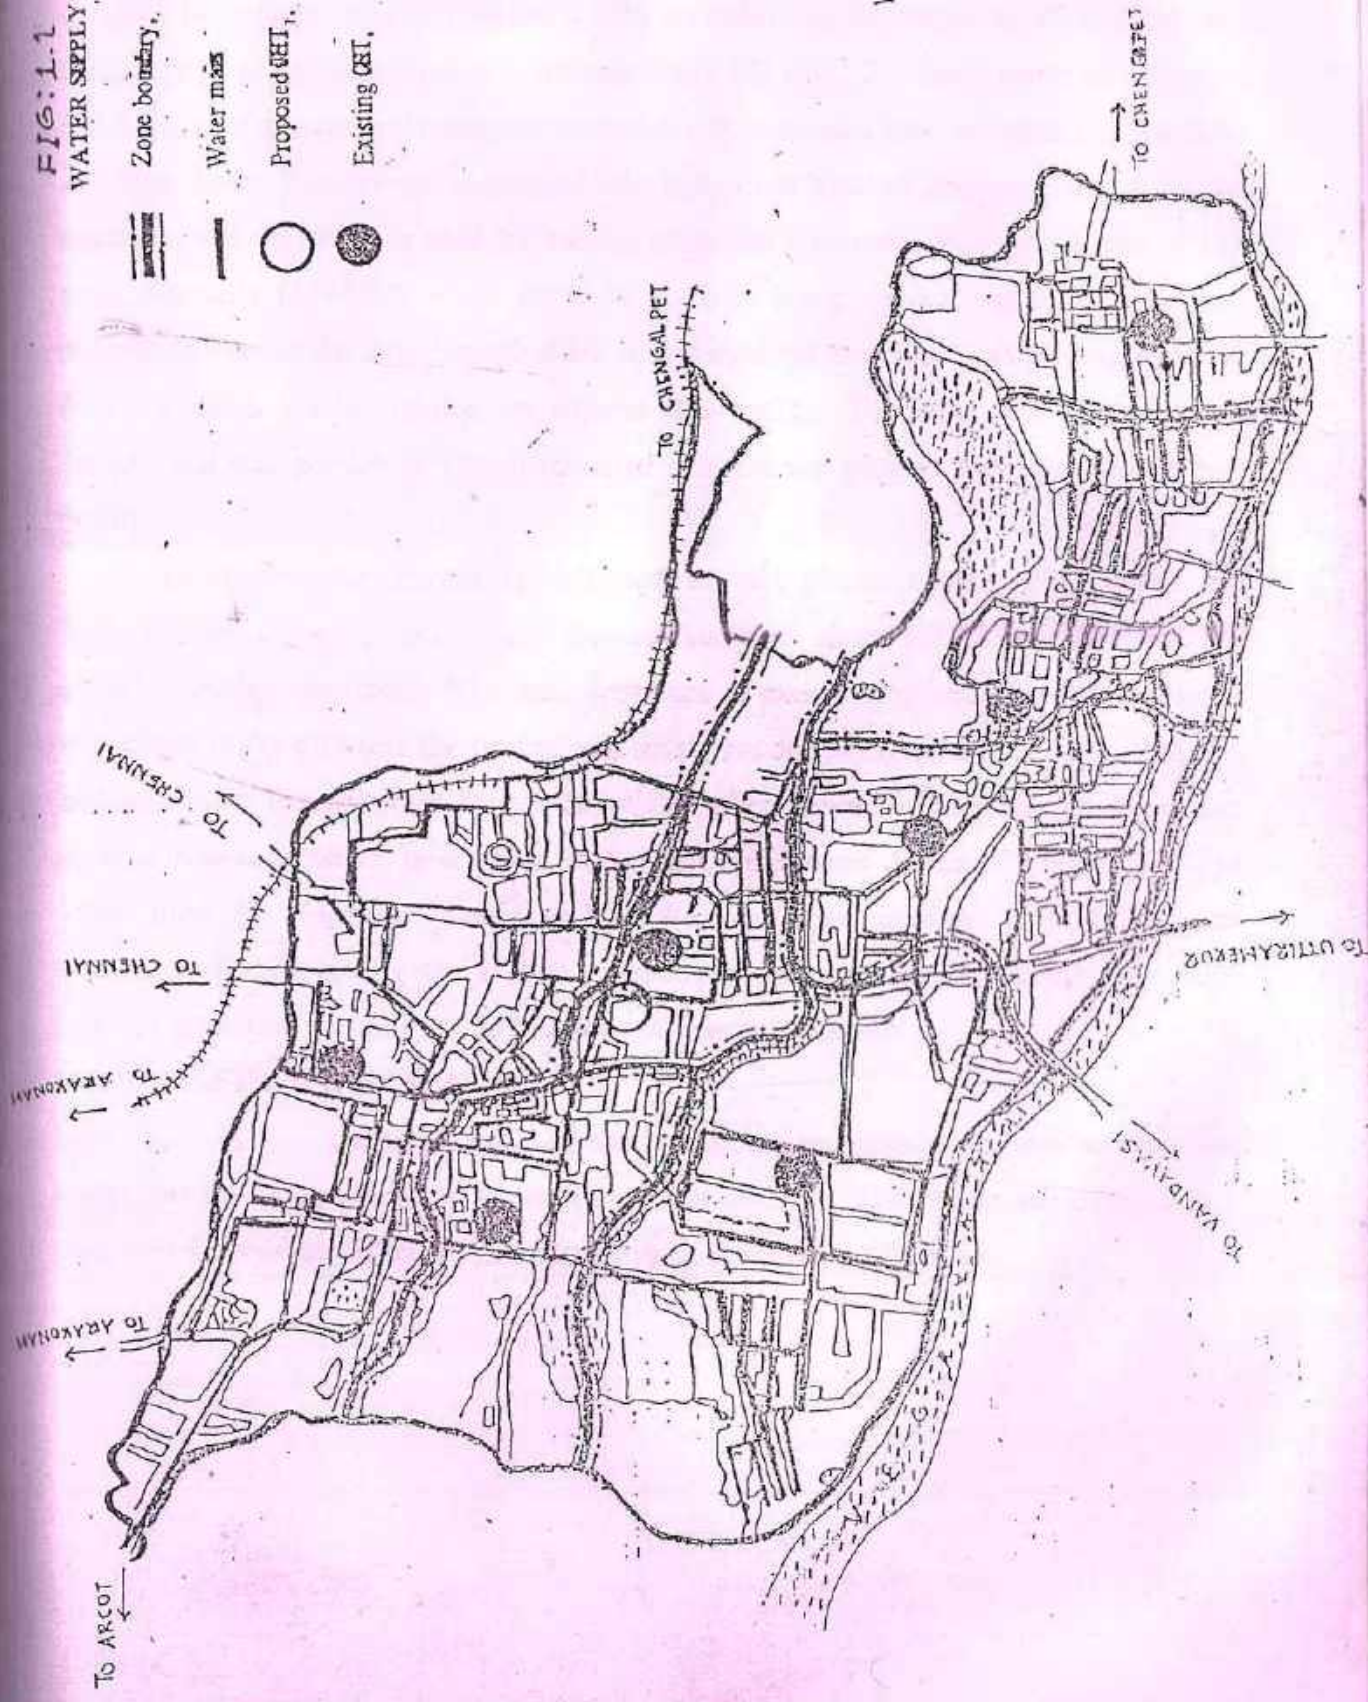

The distribution lines are 42 KM long. There are 20,520 public house connection. The daily supply is 21.5 ml and the per capita supply is 95 litre per head per head per day. (Fig 1.1 – gives water supply zones, water mains, location of existing and proposed OHTs)

In the rural areas most of the villages have only common wells maintained by the local panchayats. In some villages ponds are also maintained for drinking water apart from the common wells.

DRAINAGE AND SEWERAGE SYSTEM:

1.35 Kancheepuram one of the city where underground sewerage and drainage system is available. This scheme was sanctioned at the instance of the Government of India, which declared Kancheepuram as one of the hyper endemic towns and Rs.1.20 crore was sanctioned in the year 1970 for this project. This scheme was designed for a population of 1.50 lakhs with an estimated discharged of 90 mld but now the discharge as per Municipality's information is 137 mld. For the purpose of collection and disposal of sewage and rainwater the entire city is divided into two parts i.e East Zone and West Zone. The sewage is pumped into lagoons at Tirukali kadu and, left to natural treatment, and the water is used for raising grass and coconuts etc, over an area of 112 acres. Annually (1996-97), about Rs.79.50 lakhs is being spent towards sewerage and drainage system in the city. Though there is underground sewerage and drainage system, there are still a number of pockets without this facility. The areas near Kailasanathar Temple, and one portion of Ekambaranathar Temple are without sewerage or drainage facility.

As of now the sewage is collected in two places namely PSK street and Tenambakkam covering about 44000 households. Still about 9500 households are not sewer by sewage connection. The main problems of maintaining sewerage system in the city related to the effluents the dyeing industries that are too toxic and of high pollution load are let into the drain cum sewage flows that affect seriously the plant and vegetation growths in sewage farms. In addition, in the east zone, about 8 mld of sewage with dye wastes joins the Vegavathi course, and in the west zone, another 12 mld falls into Manjaneer channel mainly due to lack of house connection. Fig. 1.2 depicts the main drainage lines zone boundaries and locations of pumping stations.

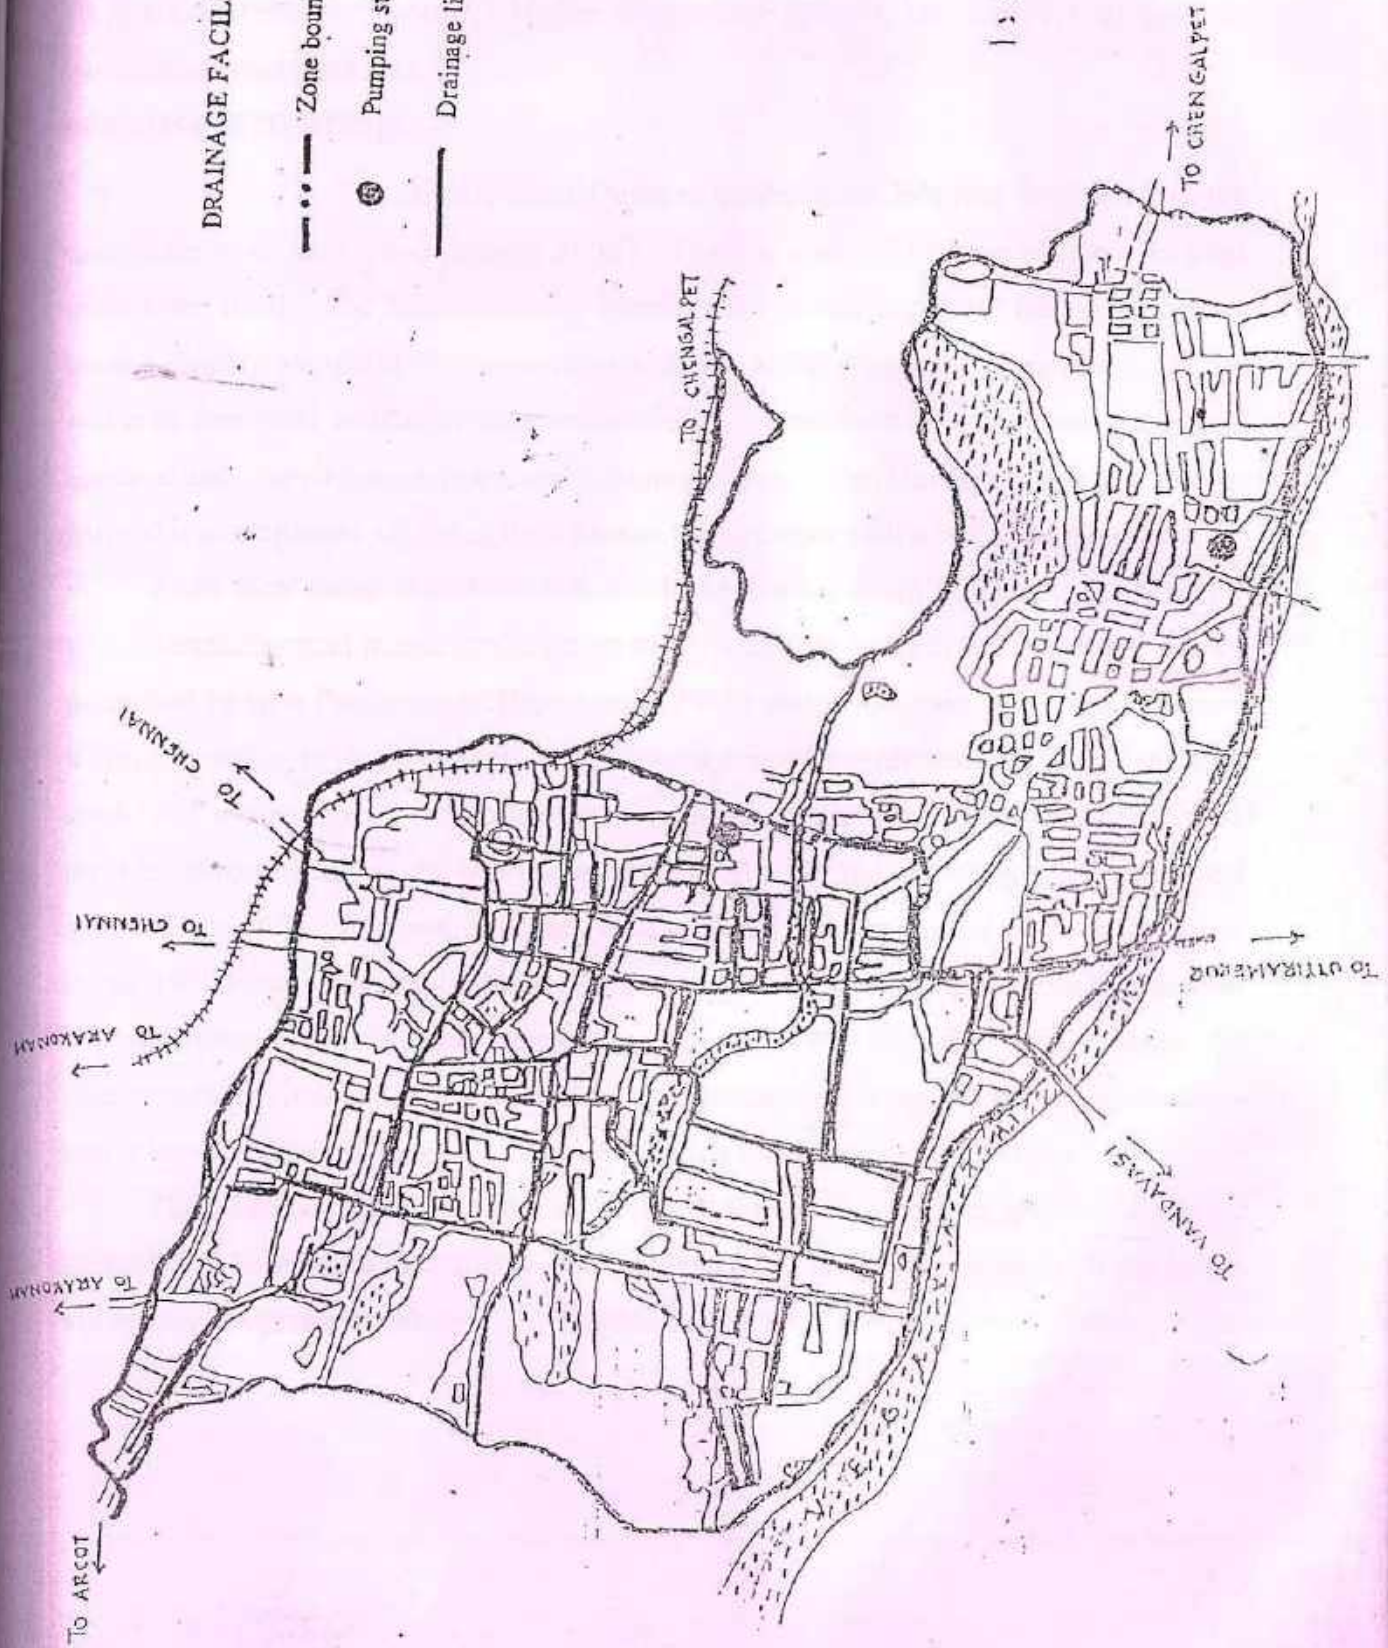

SOLID WASTE MANAGEMENT

1.36 About 90 tones of solid waste are generated every day and they are transported by 6 mini lorries, 6 power tillers and 10 carts. The wastes are dumped at a place called Vaiyavur which lies just outside the Local Planing Authority.

EDUCATIONAL INSTITUTION:

1.37 There are 23 Primary Schools, 16 Higher Elementary Schools, 7 High schools, 6 Higher Secondary Schools, 2 Arts Colleges, 2 Engineering Colleges and one Polytechnic in Kancheepuram town for the need of the students. One basic school, 14 typewriting institutes and a Co-Operative Training Institute are also situated in the town. There are 12 Primary Schools, 2 Higher Elementary Schools, one high school and one polytechnic in the rural area.

HEALTH INSTITUTION:

1.38 The District Head Quarters Government Hospital is situated in the heart of the town with a bed strength of 367. There is also a Christian Mission Hospital in the town itself. The Kancheepuram Municipality is running three free dispensaries, seven maternity and child welfare centres and one aided Ayurvedic dispensary. In the rural area four rural welfare centers are available. Apart from this there are number of private clinics available in the Local Planning Area. The Government Anna Cancer Hospital is also situated adjoining the Chennai-Vellore road with a bed strength of 250.

Apart from these institutions it is worth mentioning about Manjaneer canal of the town. Manjaneer canal meant for irrigation of agricultural lands down stream of the city maintained by state Public works Department (PWD) and it was once an attractive feature in the city running to the full length of the city for about 5643 metres with its branches for about 1695 meters length. Infact before the protected water supply was extended to the city, Manjalneer canal met the water supply of the city. But today having been encroached upon both the sides it carried only the sewage water from the areas on both the sides. During 1995 flood some encroachments were compulsorily removed to allow the flood to flow and some extent, this was repeated in 1996 and 1999 also. But on the whole, the canal remained silted and narrowed by encroachments, which require remedial measures to save the city from flooding and inevitable pollution from waste water flows.

The proposal therefore comprises desilting the canal to a proper gradient so that to keep the bed level width at 6 m and at top embankment level 10 m wide, both the banks will be lined with cement blocks.

To prevent pollution by house holds and industries letting dye -waste may be strictly warned not to let the sewage water of their houses into this river. So also Vegavathi river gets polluted by sewage water form the houses, dye -waste. The encroachers as well as those letting their wastes are to be suitably prevented by imposing fine under public health act.

Kancheepuram town is one of the philaria affected towns. Health department of state Government and Kanchipuram Municipality shares in eradicating the philaria. Spraying bitex, fogging machine and chemicals in the mosquto breedy area and in general in the residential streets are the methods adopted to eradicate this decease in this town.

KANCHEEPURAM LOCAL PLANNING AREA

Position Of The Town In The Administrative Setup

1.39 Kancheepuram town is a first grade Municipality since 1947 (at present special grade) and also Kancheepuram District Head Quarters from 1971 onwards. The area of the town is 11.52 sq km. The Local Planning Area comprises the Kancheepuram Municipality, one Town Panchayat and 33 villages. The town limit is administrated by the Municipal Councils, Town Panchayats and Panchayats by respective Panchayat councils.

The Kancheepuram Local Planning Area was declared under section 10(4) of the Town and Country Planning Act 1971 vide G.O.Ms.No. 2162 RDLA Department dt. 5-10-74 and the Local Planning Authority was constituted under section 11(1) & (3) vide G.O.Ms.No. 1138 RD & LA dt. 7-6-76. Recently the Government have issued orders viz G.O (D) 434 H & U.D dt. 14-12-98 and G.O (D) 435, H & U.D dt. 14-12-98 appointing new members to the authority and that is in vogue.

CHAPTER II

SCOPE FOR URBANISATION

LIMITATION DUE TO NATURAL FEATURES:

2.01 Kancheepuram town is traversed by river Vegavathi which bisects the Local Planning Area into the two. There are five major tanks which irrigate the fertile land within the Local Planning Area and there fore restricts the uniform development of the urban Area. In the south of the Local Planning Area the river Palar runs towards east which also restricts the development in the southern side of the Local Planning Area.

LIMITATION TO MAXIMUM POPULATION AND POPULATION

DENSITY PROPOSED:

2.02 The present area of Kancheepuram town is 11.52 sqkm and the population as per the census in 1991 is 1,44,955. The density of the town is 12,583 persons/sqkm. For the entire Local Planning Area the density is 2446 person/sqkm. There is no limitation for urbanisation due to the maximum population and population density fixed as there is large gap to be filled in.

LIMITATION DUE TO ADMINISTRATIVE JURISDICTION:

2.03 The present development confirms to only to the Local Planning Area. There is enough scope for urbanization within the present Local Planning Area itself and therefore there is no limitation due to administrative jurisdictions.

SCOPE FOR URBANIZATION OF THE LOCAL PLANNING

AREA:

2.04 Considering the above factors of limitation, limitation for the urbanization of the Local Planning Area as such are very meagre. Therefore the spatial distribution for the various land uses are worked out taking into consideration of the projected population for the year 2011 and various methods are worked out based on adopted standards.

The criteria adopted to assess the future spatial requirements for the proposed people during the year 1991-2001 of the Kancheepuram Local Planning Area is 45% of urbanisable area would be for residential, the remaining 55% of the urbanisable area would be for other uses.

Assuming a net density (population/residential area) of 250 persons per hectare, area of 2150 hectares in the year 2001 and area of 1780 hectares in the year 1991 as totally developed area are required for the Kancheepuram Local Planning Area.

The urbanisable land required for various categories out of the proposed land use is worked out. The guidelines issued by the Directorate of Town and Country Planning in its Circular No.MP.4/dt. nil are adopted.

The urbanisable land requirements for various uses have to be acquired in proper places with the consideration of the objectives as mentioned in the next chapters.

CHAPTER III

ANALYSIS AND PROPOSALS

POPULATION PROJECTION

3.01 The following methods are generally analyzed in calculating the future population.

1. Arithmetical increase method
2. Geometric ratio method
3. Second degree curve method
4. Graphical method

Here, the arithmetical increase method and geographical methods were employed to project to the future population.

The projected population as per these methods are as follows:

Methods	Town		Local Planning Area	
	2001	2011	2001	2011
1. Growth rate method	1,03,555	1,17,783	3,06,872	4,56,011
2. Arithmetic increase method	1,45,000	1,67,000	2,40,710	2,75,939
3. Graphical method	1,60,000	1,78,000	2,53,000	2,98,000

Out of these above methods the figures arrived at through graphical method is selected as these figures are comparatively moderate and convincing.

CALCULATION OF PROPOSED LAND USE AREA:

RESIDENTIAL:

3.02 The present population of the Planning Area is 1,81,754 and the future population of the Planning Area is 2,98,000. Hence the difference of population i.e, $2,98,000 - 1,81,754 = 1,16,246$ or 1,17,000 is to be accommodated in the Planning Area. Already there is a vacant space of 90.68 Hectares assuming this barren land will accommodate population of the rate of 150 Persons/Hectare, this vacant space would accommodate 13,600 population.

It is likely, thickly built up area in Varadharaja perumal temple, Kamatchi Amman temple, Krishnarajan street and the area around the bus stand may absorb more population by development by individuals on adding one more floors in the existing houses. Hence the existing developed residential area [i.e., 416 Hectares] would accommodate $416 \times 150 = 62,400$ population. Hence the balance of population to be accommodate in the Planning Area outside the town which is $1,17,000 - (13,600 + 62,400) = 41,000$. This requires 273 Hectares at the rate of 150 Persons/Hectare.

As there are large dry agriculture areas, these areas either at 150 persons/Hectare or even at lesser rate i.e., whatever at the existing rate continues may absorb this 41,000 population or the actual influx of this population.

3.03 In mixed residential areas, cottage industries employing less than 5 H.P. are allowed as per G.O. Ms. No. 1730 R.D.L.A dated 24.7.74.

To allow silk and handloom weaving industries in the residential areas, these industries may be brought in the list of cottage industries under G.O. Ms. No. 566 dated 13.3.62.

COMMERCIAL:

3.04 Though there are different methods for calculating the future requirement of commercial area, the required area for the future is arrived based on a standard of 4 Hectares/10,000 population. The commercial area thus arrived is 120 Hectares. The present commercial area is 75 hectares. Hence additional commercial area are to be proposed is 45 hectares. Out of this 45 hectares of land, 30 hectares of the area is proposed to be accommodated additionally in municipal area in excess of present commercial area of 75 hectares and the balance area is to be accommodated in the rest of the Planning Area.

INDUSTRIAL USE:

3.05 Weaving and dyeing factories are developing fastly in this area. More area is to be allowed for this use both in municipal and non municipal area. So also rice mills are very fastly developing in municipal area as well as Sirukaveripakkam, Erivakkam, Netteri and the Achchukkattu villages. Hence sufficient area is to be allotted under this category in non municipal area.

With the standard of 10% of municipal area and 0.5% of non municipal area industrial area is proposed. Weaving and dyeing factories are alone proposed in the municipal area and the all other industries additionally proposed in the non municipal area.

The total industrial area required for the future is 30 hectares for municipal area and 257 hectares for non municipal area additionally proposed under this use.

PUBLIC AND SEMI PUBLIC:

3.06 Presently 6.79% of municipal area and 10.98% of non municipal area are occupied under this use.

Hence it is proposed to bring 14% of municipal area and 6.5% of non municipal area under this use. Detecting the present area 70 hectares in municipal area and 284 hectares in non municipal area are additionally proposed under this use.

EDUCATIONAL USE:

3.07 This use is already taken care under public and semi public use. However it is shown that primary schools and middle schools are sufficient for future. It is suggested that 5 more higher secondary schools, 5 more Arts and Science colleges and 2 to 3 professional colleges including Engineering and Medical are proposed.

HEALTH:

3.08 The District Head Quarters Govt. Hospital with a bed strength of 367 is situated on the railway road within the town. The Anna Cancer Institute Hospital with 250 beds is on NH4 at karappettai village 3 kms north of the town. Seven maternity centres, three dispensaries, three family welfare centers one veterinary hospital and 11 private nursing homes exist in the town. It is felt that the existing facilities will suffice for the future also.

TRANSPORTATION NET WORK:

3.09 There are seven radial roads radiating from centre of town to neary by towns viz Chennai, Arakkonam, Vellore, Vandiwash, Uthiramerur and Chengalpattu. These roads are sufficient in number to meet future need also. However these are to be widened and strengthened to meet the future traffic.

3.10 In addition a ring road around in the west connecting Vandiswash road, Arcot road and Bangalore trunk road and another ring road connecting Chennai road and Chengalpattu road on the northern side of Local Planning Area are proposed to meet the future requirement.

3.11 Uthiramerur – Kanchipuram and Wandiwash – Kanchipuram roads are imporant major district roads in Kancheepuram (H & RW) sub division. There are a causeways across palar river in the above roads.

This causeway get breached about 6.5m to 7.5m length year by year by flash floods. Every time breaches have been temporarily closed by providing 900mm dia pipes and Veeranam pipes with sand bags.

Now the construction of highlevel bridge has been commenced at the cost of 20.00 crores and it is estimated that this work of constructions will be completed in another two years period.

This bridge if completed, would facilitate free flow of traffic to Vandavasi and Uthiramerur without being cut off during rainy season.

a) WATER SUPPLY

3.12 Organised water supply system is 100 years old. As back as in 1897 protected water supply system was established for the town near vegavathi river. This was designed for an ultimate population of 56000 at 75 lpcd. In 1961 another source in palar river bed was developed to supply water to the town. Under a new scheme, all the old water mains were replaced. There are seven water supply zones in the town each supplied by a OHT and five more OHTs were proposed. There is one ground level reservoir near Ekambaranathar temple.

The distribution lines are 42 km long and there are 20520 public house connections. The daily supply is 21.5 ml and the percapita supply is 95 lpcd.

It is proposed to increase the rate to 100 lpcd by identifying new source and improving the supply and distribution lines. Also water supply Planning Area is to be improved by extending protected water supply system and improving the present sources like well & borewells.

(b) DRAINAGE AND SEWERAGE SYSTEM

3.13 Kancheepuram one of the town where underground sewerage and drainage system is available. Town with similar population size are having only open drains and no underground sewerage system. This scheme was sanctioned at the instance of the Government of India which declared Kancheepuram as one of the hyper endemic towns and Rs. 1.20 crore was sanctioned in the year 1970 for this project. The scheme was designed for a population of 1.50 lakhs with an estimated discharge of 90 MLD, but now the discharge as per municipality's information is 137 MLD. For the purpose of collection and disposal of sewage and rainwater the entire town is divided into two parts i.e., east zone and west zone. The sewage is pumped into lagoons and, left to natural treatment and the water is used for raising grass and coconuts etc.,. Annually (1996-1997) about Rs.79.50 lakhs is being spend towards sewerage and drainage system in the town. Though there is underground sewerage and drainage system, there are still few pockets without this facility. The areas near Kailasanathar temple and one portion of Ekambaranathar temple are without sewerage or drainage facility. As of now the actual disposal is higher by 27 MLD. Thus the system needs expansion if it is to serve the town satisfactorily.

(c) TOURISM

3.14 Kancheepuram being a place of great historical and religious importance is visited by a number of domestic and foreign tourists. Its closeness to Chennai City and Mamallapuram also adds to the tourist attraction especially for foreign visitors. Thus it could find a place in the one day itinerary of tourism department -Chennai- Mamallapuram - Kancheepuram. As it is falling in the religious route of Thirupathi-Thiruvannamalai, it is falling in the religious centre for Hindus. Those who visit Thirupathi also visit Kancheepuram and Thiruvannamalai. In this way Kancheepuram is able to attract domestic tourists. According to the general classification of tourist places based on flow of tourists, Kancheepuram could be grouped as of International, national level tourism importance. Flow of tourists indicates that there is substantial flow of international, national and regional level tourists.

Regarding international/foreign tourists their target is not Kancheepuram alone. They come mostly on 2 to 3 months duration and visit many tourist places in India. In case of Domestic/National tourists, they are mostly religious groups, come in buses, vans, etc and visit the place. They come from different parts of the country, viz West Bengal, Bihar, Orissa, U.P, M.P, Haryana, Rajasthan, Gujarat, Karnataka and Andhra Pradesh. The Local/regional tourists mostly come on business as well as purchase of silk sarees. On an average, during peak season, they account for about 10000 people a day.

There are six places of attraction and they are (a) Kailasanathar temple (b) Kamatchi Amman temple (c) Vaikunda perumal temple (d) Ekambaranathar temple (e) Varadaraja perumal temple and (f) Kachabeswara temple.

Tourists who visit Kancheepuram suffer for want of lodging facility as they are very meagre. Hence the facility may be increased to accommodate the inflow.

d) REMUNERATIVE PROJECTS

3.15 The following remunerative projects are suggested to be implemented by Kancheepuram Municipal body.

<u>Project</u>	<u>Project outlay</u>
1. Rajaji Market improvement	2.4 crores
2. Yathrika Nivas (lodging to the tourists)	0.1 crore

These project if implemented well yield of considerable return every year with which civic amenities could be improved and further remunerative projects be implemented.

e) SERVICE PROJECTS

3.16

1. Improvement to the Manjaneer channal.

The outlay for the project is Rs. 6.12 crores. The District Collector has already recommended this project proposal to the Government.

2. TWAD Board has been requested to formulate a drainage improment scheme for the follwing area and the proposal is pending investigation by the TWAD Board.
 1. Munuswamy Mudaliar Avenue
 2. Mamallan Nagar.
 3. Vaikundaperumal Area

3. SOLID WASTE MANAGEMENT

The municipality is maintaining 192 Big streets and 82 small streets and roads to length of 75.84Km for the speedy collection and disposal of garbage to the compost yard. It is proposed to eliminate the maintenance of Bullock Carts and to purchase either 4 mini lorries or power tillers in the coming years.

CHAPTER IV

POLICY TOOLS

LAND DEVELOPMENT POLICY:

4.01 The mutual interacting of land uses and urban service is essential for fostering functional efficiency and orderly growth of urban area.

ACQUISITION OF PUBLIC AND PRIVATE LANDS:

4.02 It is proposed to form link roads to channelise development on planned lines. The land required for the above purposes have to be acquired either by compulsory acquisition or by private negotiations. The lands required for the organized development of housing and commercial areas and provisions of water supply and drainage schemes and utilities and services, open spaces, will also have to be acquired or alienated by the respective agencies.

LAND VALUE:

4.03 The land value within the Local Planning Area varies according to the pattern of development of the land uses. Land value is maximum between Rs.1,00,000/- and Rs.2,00,000/- per ground in the town. The value decreases gradually in the fringe areas. The wet and dry land which is having a high productive value of the Local Planning Area is having the average land value of Rs.50,000/- per hectare.

DEVELOPMENT PROPOSAL:

a) Improvement to existing urban area

4.04 In the development proposed the following items are taken into account for improvement to the existing urban and the Planning strategy for such balanced area.

Improvement of the existing institutions viz

(1) public offices (2) Medical (3) Educational

b) Renewal and redevelopment areas:

4.05 Now the growth of Kancheepuram is hapazard sporadic and horizontal leaving pockets of vacant lands. Historical places are not well connected by roads and area misused. There are ribbon development of the shops along the salai street, Sengaluneer Odai street, Raja street, Nellukara street, Gandhi road, Kamaraj road and Vallal Pachiyappan Street.

There are old buildings in dilapidated conditions. These old buildings are to be rehabilitated or renewed by repairing or remodeling and restoring for giving face lift and restore of the environmental aesthetics. There is also scarcity of parking places.

Renewal and redevelopment schemes are being too costly. The conservation of these historic and cultural assets and optimisation of functional efficiency of the central area of kancheepuram through scientific studies have become priority requirements and hence proposed to be taken up in a phased manner to study and formulate structural plans for kancheepuram and initiate urgently appropriate urban renewal programmes.

The area comprising of blocks which includes one plot depth on either side of deity procession route of various major temples and the areas around Ekambaranthar temple. Kamatchi amman temple and Varatharaja perumal temple have to be taken as study area for preparing renewal plan of kancheepuram town. The encroachments are impediments to the procession during the festival periods, the shops all along procession routes and the traffic generated by them also obstruct the movement of visitors and pilgrims who visit the town. If the ribbon development of shops are allowed to continue, procession route will get worse congested and it will lose its character and function in due course.

There are discarded buildings along the procession route and around the three major temples mentioned above. Those old buildings are to be rehabilitated or renewed by repairing, remodeling and restoring. A face lift has to be given to old buildings abutting roads along procession route.

So necessary plan have to be prepared for the area comprising of one plot depth on either side of the area around the three major temples mentioned above.

1. to facilitate the festivals to be carried out
2. to renew the old buildings
3. to provide the lacking facilities and services
4. to provide traffic improvement measures and
5. to prescribe the height zoning and façade control.

c) Newly Developing Area:

4.06 Most of the new development area are proposed near to (i) the existing development on the eastern side of the Local Planning Area along Chengalpattu road, (ii) on the southern side nearby the existing developments along Vandavasi road and Uthiramerur road, (iii) near to the railway station and (iv) near to the existing development along the Arcot road.

d) Protection Of Ancient Buildings And Its Environment:

4.07 The following temples and places in kancheepuram have been declared as protected monuments as per ancient monuments and Archeological sites and remains Act 58.

(1) Matangeeswara temple (2) Iravagareeswarar temple (3) Sri Vaikunda perumal temple (4) Kailasanathar temple (5) Pallava medu (6) Mutheeswara temple.

The following temples are also monuments as per directorate of archaeology Government of Tamil Nadu.

(1) Varadaraja perumal temple (2) Kamatchi amman temple (3) Ekambaranathar temple (4) Katchabeswarar temple (5) Kumarakottam.

Apart from these monuments (1) Ulagalantha perumal temple (2) Asthapujam perumal temple (3) Yadothakari perumal temple (4) Nagareeswarar temple (5) Deēpaprakasar temple (6) Gangaikondan Mandabam (7) Sankarachariar Madam and the wet agricultural lands are also to be preserved and protected.

DISPOSAL OF DEVELOPED LAND:

4.08 The disposal of developed land by sale, lease to whom the land to be allotted has to be dealt by the Local Planning Authority and its agencies if necessary.

REGULATION AND CONTROL MEASURES:

4.09 All future developments will be regulated and controlled in accordance with the provisions contained in Town and country Planning Act. 1971 zoning regulations prescribed under this master plan, Tamil Nadu District Municipalities building rules 1972

Tamil Nadu multi storied and public building rule 1973 ,Tamil Nadu Panchayat building rules 1997 and Act ,rules instructions/Government orders issued on regulation of Heritage elements and monuments.

4.10 In addition the land use zoning and other development controls will prevail over the master plan provisions wherever the detailed development plans are approved/ sanctioned / consented.

4.11 In kancheepuram town, the height of buildings should not exceed 9.0 metres, i.e., such buildings should not exceed three floors, i.e., Ground floor + 2 floors. The following temples and places declared as protected monuments under the Ancient monuments and Archeological sites and remains Act 1958.

1. Iravatheswarar Temple.
2. Matangeswara Temple.
3. Mukteswara Swami Temple.
4. Jivarachareswara Swami Temple.
5. Pallavamedu Site.
6. Vaikunda Perumal Temple.
7. Kailasanathar Temple.
8. Piravathanesvara Temple.

The temples that are declared as monuments as per Director of Archeology of Tamil Nadu are:

1. Varadaraja Perumal Temple.
2. Kamakshiamman Temple.
3. Ekambaranathar Temple.
4. Katchabeswarar Temple.
5. Kumara Kottam.

It is suggested that in all other zones, the following proposals are suggested in general.

1. No building in this town shall be Constructed not more than 9 metres height.
2. There shall not be any construction with in 100 metres of monuments under the control of Archeology survey of India and between 100 and 300 metres, construction may be done with the permission of Archeological survey of India.

3. As for as monuments under the control of Directorate of Archeology Government of Tamil Nadu is concerned, no such control is imposed.

To preserve these temples and monuments heritage zones are identified in the heritage development plan proposed by Anna university in the year 1998 and the same is incorporated in the proposed land use map.

PROPOSAL

1. Drinking water should be provided within the temple
2. Portable dust bins may be kept inside the temple complex so as to make the people use them throwing the wastes into them.
3. Buildings with the heritage zone should not be higher than the temple compound walls.
4. The tanks if any should be maintained and any washing or bathing in the tanks by any person should be strictly stopped.
5. The interiors of the temple sacro sanctom are becoming smoke deposited due to camphor burning and a solution may be thought of to avoid this damage to the temple.
6. Heavy vehicles should be permitted only in the four major roads, and inner roads/streets shall be made as pedestrian and for two wheeler traffic only.
7. Proper parking space should be identified and orderly parking of vehicles to be ensured.
8. Entry point to the temple needs face lifting in the form of arches and the like.
9. There should be adequate publicity and direction to the location of the temple displayed at strategic locations in the city.

There is height restriction of 9 m in whole of the town, as Kancheepuram is identified as one of the heritage centres in Tamil Nadu. Hence there need not be any area set apart for multistory buildings.

ABSTRACT:

Town Planning-Preparation of Zonal Plans – Formulation of Draft regulations submitted by the Director of Town and Country Planning – Approved

Rural Development and Local Administration Department

Ms.No. 1730.

Dated the 24th July, 1974.

1. D.O. Letter No.28332/MD/73-1. RD& LA., dt: 7.3.73
2. From the Director of Town and Country Planning, letter No.10989073, SM/dt:2.3.74
3. From the Member-Secretary, Madras Metropolitan Development Authority, D.O.Letter No. 19831/274., ADP/dt: 19.5.74

ORDER:

The Director of Town and Country Planning submitted draft Zoning regulations for use of land and building particulars in urban areas. These regulations list out of the uses permissible in each of the use zone and the restrictions to be imposed. For the purpose of these regulations, it has been suggested that the urban areas may be divided into the following six major use zone:-

1. Residential Use Zone
2. Commercial Use Zone
3. Industrial Use Zone
4. Educational Use Zone
5. Public And Semi Public Use Zone
6. Agriculture Use Zone

Of course, the residential use zone has been further sub-divided into two categories namely:-

1. Primary Residential Use Zone And
2. Mixed Residential Use Zone.

The Industrial use zone has been similiary sub-divided into three catergories namely:-

1. **Controlled Industrial Use Zone**
2. **General Industrial Use Zone**
3. **Special Industrial And Hazardous Use Zone**

The director has also stated that the Tamil Nadu Town and Country Planning Act, 1971 provides for the Zoning of areas under Section 17(1) and 20(2) through the Master Plans and detailed Development Plans respectively. He has recommended that the draft Zone regulation may be approved and communicated to the Local Planning authorities for adoption as part of the Master Plan for proper Land use planning and control in addition to other regulatory measures and that as for the Madras Metropolitan Area a copy of the regulations may be sent to the Member-Secretary, Madras Metropolitan Development Plan with such modifications may be necessary in consultation with him (the Directory) and the Government.

A copy of the draft regulations was sent to the Member – Secretary, Madras Metropolitan Development Authority for his views. He has stated that the comprehensive land use proposals and zoning regulations for Madras Metopolitan Area are under preparation and that the suggestion of the Town Planning Directorate will be considered and incorporated to the extent as may be necessary in the final proposals.

The Government have examined the suggestion. They accept the views of the Member-Secretary, Madras Metropolitan Development Authority so far as it relates to the Madras Metropolitan Area and as for other Urban areas of the State, the Government approve in principle the draft zoning regulations submitted by the Director of Town and Country Planning. The Director is requested to furnish copies of the draft zoning regulations to the Local Planning Authorities as soon as they are constituted.

5. The receipt of this order may be acknowledged by the Director of Town and Country Planning.

Dated : 23.03.2000

READ :

1. G.O.Ms.No.408; Housing and Urban Development Department, dated: 02.07.92.
2. From the Special Commissioner of Town and Country Planning, Letter Roc.No.35913/99, MP1, Dated 14.01.2000.

ORDER:

In the Government order first read above, the Government accorded approval under section 28 of the Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972) to the Master Plan of the Kancheepuram local planning area and the same was published in the Tamil Nadu Government Gazette, dated the 5th October 1992. As per the provisions contained under clause (b) of Sub-section (2) of section 32 of the said Act, once in every five years, after the date on which the master plan for an area comes into operation, the local planning authority, may and if so directed by the Government, shall after carrying out such fresh surveys as may be considered necessary and in consultation with the regional planning authority and the local authorities concerned, review the master plan and make such modification in such plan wherever necessary and submit the modified plan for the approval of the Government.

2. The Special Commissioner of Town and Country Planning in his letter second read above has stated that by virtue of the provisions contained under clause (b) of Sub-Section (2) of section 32 of the said Act, the Kancheepuram local planning authority has reviewed the existing approved master plan for that planning area on its own accord and prepared a draft modified master plan for the Kancheepuram local planning area after taking into account of the latest developments and future requirement. 4. அரசாணை (நிலை) எண்.234 நநி & கு.வ.துறை நாள் 27.11.95.

பூநீரங்கம் நகரத்தில் பூநீரங்கம் கோவில் சுற்றுச்சுவரிலிருந்து 1 கி.மீட்டர் சுற்றளவுக்குள் கட்டப்படும் கட்டிடங்கள் தரை மற்றும் முதல் தளம் சேர்ந்து உயரம் 9 மீட்டருக்குள் இருக்க வேண்டும் என்றும், இந்த வரையறைக்குட்படாத அதாவது 1 கி. மீட்டர் தூரத்திற்கு அப்பால் உள்ள கட்டிடங்கள் உட்பட அனைத்து கட்டிடங்களுக்கான விண்ணப்பங்களும் அரசுக்கு பரிசீலனைக்கு அனுப்பப்பட வேண்டும் என்றும் அரசாணை நிலை எண்.233 நகராட்சி நிர்வாகம் மற்றும் குடிநீர் வழங்குதலுறை நாள் 27.11.95ல் உத்திரவிடப்பட்டது. 27.11.95 நாளிட்ட நகராட்சி நிர்வாகம் மற்றும் குடிநீர் வழங்கு துறையின் அரசாணை எண்.234-ல் பூநீரங்கம் நகரத்தைப் போலவே மற்ற இணைப்பில் கண்ட புராதன நகரங்களில் கட்டப்படும் கட்டிடங்களை முறைப்படுத்துவதை கருத்தில் கொண்டு மற்ற புராதன நகரங்களுக்கும் அவைகளின் தனித்தன்மையை கணக்கில் எடுத்துக்கொண்டு விதிமுறைகளை முடிவு செய்து அரசுக்கு பரிசீலனைக்கு அனுப்புமாறும் மேற்கண்ட முறைகளை முடிவு செய்யும் வரை எல்லா புராதன நகரங்களுக்கும் கட்டிட அனுமதி கோரும் செயற்குறிப்பினை அரசின் ஒப்புதலுக்கு அனுப்புமாறும் நகர் ஊரமைப்பு இயக்குனர் கேட்டுக் கொள்ளப்பட்டார்.

2. மேற்படி ஆணைகளின்படி புராதன நகரங்களில் கட்டக்கூடிய கட்டிடங்களுக்கென அனுமதியை அரசிடம் பெறவேண்டும் என்பதில் நடைமுறையில் ஏற்படுகிற பல சிக்கல்களையும் கால தாமதங்களையும் பொதுமக்களுக்கு ஏற்படுகிற பிரச்சனைகளையும் தவிர்க்கும் பொருட்டு மேற்படி அரசாணைகளை இரத்து செய்வது பற்றி அரசு பரிசீலனை செய்தது.

3. பரிசீலனைக்குப் பின் மேலே பத்தி 1ல் கூறப்பட்டுள்ள அரசாணைகளை அரசு இரத்து செய்கிறது. மேலும் இணைப்பில் கண்டுள்ள 38 புராதன நகரங்களிலும் புராதன கோவிலின் சுற்றுச் சுவரிலிருந்து 1 கிலோ மீட்டர் சுற்றளவிற்குள் கட்டப்படும் கட்டிடங்கள் (தரை தளம் மற்றும் முதல் தளம்) 9 மீட்டர் உயரத்திற்கு மிகாமல் கட்டப்பட வேண்டும். எனவே இந்தக் கட்டுப்பாட்டின் அடிப்படையில் சம்பந்தப்பட்ட உள்ளாட்சி நிறுவனங்கள் கட்டிடங்களுக்கான அனுமதியை வழங்கலாம் எனவும் அரசாணை பிறப்பிக்கிறது.

2. நகர் ஊரமைப்பு இயக்குநர் நேர்முக கடிதம் எண்.48935/95/கவி1
17.04.97.

பார்வை ஒன்றில் காணும் அரசாணையில் அரசு புரதான நகரங்களில் புரதான கோவிலின் சுற்றுச்சுவரிலிருந்து 1 கி.மீ. சுற்றளவுக்குள் கட்டப்படும் கட்டிடங்கள் (தரைத்தளம் மற்றும் முதல் தளம்) 9 மீ. உயரத்திற்கு மிகாமல் கட்டப்படவேண்டும் எனவும் இந்தக் கட்டுபாட்டின் அடிப்படையில் உள்ளாட்சி நிறுவனங்கள் கட்டிடங்களுக்கான அனுமதியை வழங்கலாம் எனவும் ஆணை பிறப்பித்துள்ளது.

2. நகர் ஊரமைப்பு இயக்குனர் பார்வை இரண்டில் காணும் தனது கட்டிடத்தில் பொதுவாக தரைத்தளம் மட்டுமே உள்ள கட்டிடமாயின் 3 மீ உயரத்தில் அமையும் என்றும் மேற்கொண்டு தளங்கள் உடைய கட்டிடமாயின் அது 2.75 மீ. உயரத்திலிருந்து 3மீ. உயரத்தில் அமையும் என்றும் இதன்படி கணக்கிட்டால் 9மீ உயரத்தில் தரைத்தளம் மற்றும் இரண்டு தளங்கள் வலமமாகக் கட்டலாம் என்றும் ஆனால் பார்வையில் காணும் அரசாணையில் தரைத்தளம் மற்றும் முதல் தளம் என்று வரையறுக்கப்பட்டிருப்பதால் அது சிக்கனமானதாக இராது என்றும் குறிப்பிட்டு 9 மீட்டர் உயரத்திற்குள் கட்டிட உயரம் அமையும்படி பார்த்துக் கொள்வதால் பேறுபாடு இராது என்று கூறியுள்ளார். அவர் மேலும் இத்தகைய கட்டிடங்கள் தரைத்தளம் மற்றும் இரண்டு தளங்கள் இருந்தாலும் கட்டிடத்தின் உயரம் 9 மீட்டருக்குள் இருக்குமாயின் கட்டிட அனுமதி வழங்கலாம் என்று கணிக்கப்படுகிறதென்று கூறி இக்கணிப்பை உறுதி செய்யும்படி அரசிடம் கோரியுள்ளார்.

3. மேற்கூறிய சூழ்நிலை நகர் ஊரமைப்பு இயக்குநரின் கணிப்பை உறுதி செய்து புரதான நகரங்களில் புரதானக் கோவிலின் சுற்றுச் சுவரிலிருந்து 1 கி.மீ. சுற்றளவுக்குள் அமையும் கட்டிடங்கள் 9 மீட்டர் உயரத்திற்குள் இருக்க வேண்டுமென்றும் அவ்வாறிருந்தால் அவை தரைத்தளம் மற்றும் இரண்டு தளங்கள் கொண்டவையாக இருப்பினும் கட்டிட அனுமதி வழங்கப்படலாம் என்றும் தெரிவிக்கிறது. நகராட்சி நிர்வாக இயக்குனர் பேரூராட்சிகளின் இயக்குனர் ஊரக வளர்ச்சி இயக்குனர் ஆகியோர் புரதான நகரங்கள் பட்டியலில் இடம் பெறும் உள்ளாட்சி நிறுவனங்களுக்கு இதனைத் தெரிவிக்குமாறு கேட்டுக் கொள்ளப்படுகிறார்கள்.
